However, such norms are still ubiquitous in educational institutional and social settings in political structures and in research paradigms. This collection offers voices from various contexts and corners of the world and further challenges the native speaker construct adopting poststructuralist and postcolonial perspectives. It includes conceptual, methodological, educational and practice oriented contributions. Topics span language minorities, intercomprehension, plurilingualism and pluriculturalism, translanguaging, teacher education, new speakers, language background profiling, heritage languages and learner identity, among others. Collectively, the authors paint the portrait of the changing face of the native speaker while also strengthening a new global agenda in multilingualism and social justice. These diverse and interconnected contributions are meant to inspire researchers, university students, educators, policy makers and beyond. **Annual Report** Virginia.
