

Greening the Library: The Fundamentals and Future of Ecocriticism

By Loretta Johnson

Over the last three decades, ecocriticism has emerged as a field of literary study that addresses how humans relate to nonhuman nature or the environment in literature. Today, with the development and expansion of ecological studies, any line between human and nonhuman nature has necessarily blurred. So when subjected to eco-criticism, literature of all periods and places—not only eco-centric or environmental literature or nature writing, but all literature—is viewed in terms of

place, setting, and/or environment, all of which have taken on richer meaning. Ecocriticism poses a variety of questions: Would a shift toward an ecological conception of nature change the ways humans inhabit the Earth? Do authors impose certain values and make assumptions when they present the environment and nonhuman life in their works? How does one avoid binary oppositions, or should one perceive human nature in an *It is or It isn't* relationship?

A rapidly changing theoretical approach, ecocriticism grows out of the traditional approach to literature, in which the critic explores the local or global, the material or physical, or the historical or natural history in the context of a work of art. Such approaches can be interdisciplinary, involving knowledge of environmental studies, the natural sciences, and cultural and social studies. Though it became a subject heading in the Library of Congress list of "Anthropology" in 2003, ecocriticism is not yet listed in the *Oxford English Dictionary*. However, many words prefixed "eco" are listed, among them "ecocriticism" and "ecocritics." "Bio,"

from the Greek root *bios*, means "house." The *OED* cites the German analog as the first appearance of "ecology" (in 1874), meaning "the branch of biology that deals with the relationships between living organisms and their environment." Just as "ecology" is the management or law of the house (*oikos* = house), "ecology" is the study of the house. Ecocriticism, then, is the criticism of the "house," i.e., the environment, as represented in literature. But the definition of "house," or *oikos*, is not simple. Questions arise: What is the environment? What is nature? Why did the term "environment," which derives from the verb "to environ or surround," change to mean that which is nonhuman? Are not humans natural and a prominent environment in themselves? Where and in what does one live? Ecocriticism is by nature interdisciplinary, involving knowledge of environmental studies, the natural sciences, and cultural and social studies, all of which play a part in answering the questions it poses.

Since 1990, ecocriticism has burgeoned. Today a keyword search for "ecocriticism" in the MLA Bibliography online produces 422 hits, three-quarters of which are from the last eight years. Ecocriticism has entered academic course

lists worldwide, along with the creation of interdisciplinary academic faculty positions to teach them. Peter Barry added a chapter titled "Ecocriticism" to the second edition of his *Beginning Theory: An Introduction to Literary and Cultural Theory*, but recently claims that ecocriticism has no coherent model. Accordingly, he lists "what ecocritics do," which includes read literature from an eco-centric point of view; apply ecological issues to the representation of the natural world; focus on nonfiction and environmental writing that features "nature"; and show appreciation for ethical positions toward nonhuman nature.

Although of major importance to ecocritical studies, omitted from this essay are works on environmental science, ecology, environmental history, ecological economics, and ethnology. Instead the essay focuses exclusively on the new position in this area and includes only the most important works on the relationship between culture and nature relative to ecocriticism. As a result, most of the works discussed here are within the purview of English and American literature studies and literary theory in English departments.

Essential Texts and Manifestos

Some ecocritics trace the advent of the word "ecocriticism" to William Rueckert, who in a 1978 essay titled "Literature and Biology: An Experiment in Ecocriticism" wrote that ecocriticism entailed "application of ecology and ecological concepts to the study of literature." Cheryl Glazefield and Harold Fromm quite rightly included Rueckert's essay in their edited volume *The Ecocriticism Reader: Landmarks in Literary*
