

Seafloor Spreading

Objectives:

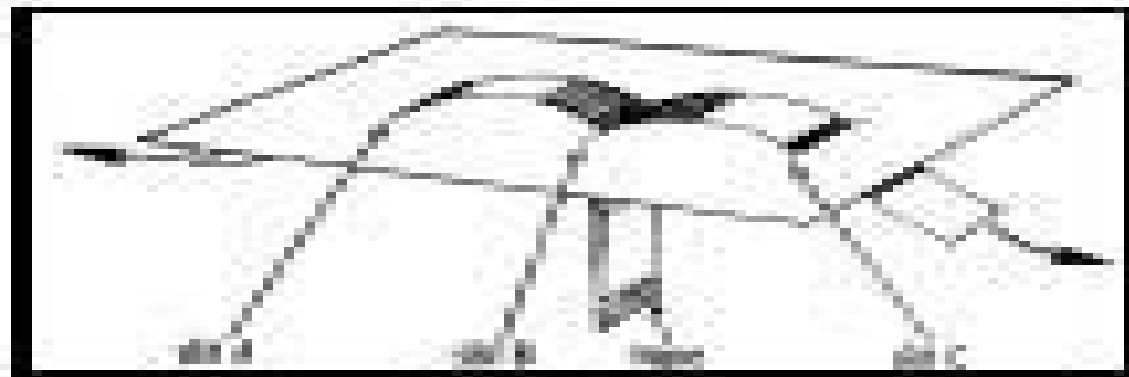

Along the mid-ocean ridges of the ocean, new ocean floor is being created. Although this process takes place continuously, it is difficult to observe directly. In the following activity, you will build a model to help understand this process.

Materials:

Colored Paper
Scissors
Tape

Procedure:

1. Cut along the dotted lines of the seafloor-spreading model pattern.
2. Cut the strips, indicated on the base strip with colored pencils.
3. Tape together the seafloor model of the strips with the colored paper through each slot.
4. Thread the base strip through slot A.
5. Pull the strip down through slot A, and then strip through slot C.
6. Pull the strip through slot A, so that the bottom portion of each strip protrudes from slot B and disappears into slot C at the spreading.
