

## [ANSWER] CASE STUDY DELOITTE

### a. Preventing and detecting fraud and error

The directors of Bush-Baby Hotels Co (Bush-Baby) are responsible for the prevention and detection of fraud and error. However, the new internal audit department can help the directors by assessing the main areas of fraud risk, assessing the adequacy and effectiveness of control systems and helping to develop controls to mitigate key risks.

Having developed the controls, they can undertake regular reviews of compliance by each hotel of these controls. Where non-compliance is identified, they can instigate further training if necessary or report suspected frauds to senior management.

Where fraud is suspected, the internal audit department can undertake a detailed fraud investigation to identify who is involved, likely sums stolen and gather evidence for any subsequent police investigation.

In addition, the presence of an internal audit department can itself act as a fraud deterrent, as the risk of being discovered means individuals are less likely to undertake fraudulent activities.

### b. Additional functions

#### Monitoring asset levels

The internal audit department could undertake inventory counts at the restaurants of the 18 hotels. There is likely to be a significant level of goods held at each hotel. Internal audit could count actual levels of goods held and compare them to the hotels' records. If consistent negative differences occur for a hotel, then this may be an early indicator of fraud. If positive differences are highlighted, then it could be because employees have not been adequately trained on how to record inventory.

#### Cash controls at hotels

Bush-Baby's internal auditors could undertake controls testing over cash receipts and cash counts. It is likely that cash at each hotel will be significant as there would be cash at the reception, restaurant and leisure club. Each hotel should have tight controls over the cash receipts process. These controls should be tested at each location as well as performance of a cash count to reduce the level of errors.
