Interface Between The Psychodynamic And Behavioral Therapies:

The Interface Between the Psychodynamic and Behavioral Therapies Judd Marmor, 2012-12-06 It is sobering to reflect that it has been nearly fifty years since Thomas French's article on the Interrelations between Psychoanalysis and the Experimental Work of Pavlov representing the first psychoanalyst to bridge the gap between the theories of conditioning was published. In his paper French clearly delineated the manner and directions in which these two points of view might enrich each other. Regrettably his openness to new ideas has not been characteristic of most schools of psychiatry thought which have tended instead to develop an unfortunate degree of insularity. This has occurred despite the obvious reality that the bio-social psychological nature of man is such that no one theory or discipline is likely in the foreseeable future to explain much less predict all of the complexities of human behavior. All too often disputing theoreticians like the fabled blind men describing the elephant assume that the whole is just a gigantic magnification of the parts with which they are in contact. When treatment strategies are extrapolated from such narrow views more often than not they fail to achieve the parsimony of effort, the breadth of application and the maximum of efficiency that one would hope for. In our opinion it is impossible adequately to conceptualize personality development, symptom formation or responses to psychotherapy without taking into consideration theories of conflict as well as those of learning.

Psychoanalytic Therapy and Behavior Therapy Harold (Hal) Hall, 2013-11-11 This book has a question mark in its title because it aims to invite inquiry. The possibility of integrating psychoanalytic and behavior therapies has been controversial since it was first proposed about 50 years ago and this has elicited a wide range of reactions from both psychologists and psychiatrists. It was with the hope of fostering constructive interchange that this book was conceived. We wanted to spark further thinking about the question in the title in a way that could lead either to conceptual and clinical progress toward an integrated approach or to a clearer sense of the obstacles involved. In either case we hoped that it would present a healthy challenge to current forms of psychoanalytic and behavior therapies. The present volume was stimulated by the appearance in 1977 of Paul Wachtel's book *Psychoanalysis and Behavior Therapy: Toward an Integration*. Although many reviewers did not necessarily agree with Wachtel's proposals for integration they and we were highly laudatory of his attempt. After reading the book Hal Arkowitz organized a symposium on integration that took place in Chicago at the November 1978 meeting of the Association for the Advancement of Behavior Therapy. The symposium included Cyril Franks, Merton Gill, Hans Strupp, Paul Wachtel and Michael Merbaum as moderator. Arkowitz subsequently proposed to edit a book on integration and invited Messer to be coeditor.

John D. W. Andrews,1991 Extraordinary Disorders of Human Behavior Claude T. H. Friedmann,Robert A. Faguet,1982

Clinicians have long been fascinated by the rare and exotic in medicine Similarly psychiatrists and mental health professionals have been intrigued by the uncommon and extraordinary syndromes which despite their rarity have much to teach us about the limitless forms of human adaptation Of particular interest is the fact that fragments and partial expressions of these rare disorders are often encountered in the dreams and fantasies of the ordinary patient For this reason the understanding and insights collected in this volume are likely to have clinical usefulness far beyond those rare occasions

when we encounter the exotic in its fully developed form These disorders demonstrate the complex interplay between intrapsychic dynamic forces and the cultural influences which act to shape overt symptomatology The section on extraordinary syndromes from non Western cultures demonstrates the universality of the psychodynamic roots of human suffering despite the seemingly strange forms in which this suffering is expressed As clinicians we are too often restricted by ethnocentric attitudes and culturally determined stereotypes This volume provides a stimulating and enjoyable opportunity to reach beyond those limitations
