*Global Action on School Library Guidelines* Barbara A. Schultz-Jones, Dianne Oberg, 2015-06-16 This book celebrates the new IFLA School Library Guidelines and shows how the Guidelines can be used in improving school library services. Each chapter describes innovative initiatives for developing, implementing and promoting school library guidelines. The book provides inspiration and guidance for the creation of national school library standards and for the development and use of standards and guidelines to change school library practice to define the teaching role of school librarians to guide the initial preparation of school librarians and to advocate for school library services. Contributors to the book come from around the world: Australia, Canada, Ethiopia, France, Malaysia, Norway, Poland, Portugal, Spain, Sweden and the United States. Their work illustrates the shared commitment of school librarians around the world to teaching and learning for all as envisioned in the IFLA UNESCO School Library Manifesto.

*Beyond McDonaldization* Dennis Hayes, 2017-04-19 Beyond McDonaldization provides new concepts of higher education for the twenty first century in a unique manner challenging much that is written in mainstream texts. This book undertakes a reassessment of the growth of McDonaldization in higher education by exploring how the application of Ritzer's four features efficiency, predictability, calculability and control has become commonplace. This wide ranging text discusses arguments surrounding the industrialisation of higher education with case studies and contributions from a wide range of international authors. Written in an accessible style, Beyond McDonaldization examines questions such as: Can we regain academic freedom whilst challenging the McDonaldization of thought and ideas? Is a McDonaldization of every aspect of academic life inevitable? Will the new focus on student experience damage young people? Why is a McDonaldized education living on borrowed time? Is it possible to recreate the university of the past or must we start anew? Does this industrialisation meet the educational needs of developing economies? This book brings international discussions on the changing world of higher education and the theory of McDonaldization together seeking to provide a positive future vision of higher education. Analysing and situating the discussion of higher education within a wider social, political and cultural context, this ground breaking text will have a popular appeal with students, academics and educationalists.

*The Education Invasion* Joy Pullmann, 2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls. But it had been creeping into schools nationwide over the previous three years and children were feeling its effects. They cried over math homework so mystifying their parents could not help them even in elementary school. They read motley assortments of informational text instead of classic literature. They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms. How did this latest and most sweeping reform of American education come in mostly under the radar? Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics, intrigue and arrogance. She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American

children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation's schools Who benefits And how can citizens regain local self governance in education so their children's minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies [Rankings and the Reshaping of Higher Education](#) Ellen Hazelkorn,2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars [Kochi Journal of Mathematics](#) ,2015
