Slawinski,2003-08-04 This book seeks to explore seismic phenomena in elastic media and emphasizes the interdependence of  
mathematical formulation and physical meaning The purpose of this title which is intended for senior undergraduate and  
graduate students as well as scientists interested in quantitative seismology is to use aspects of continuum mechanics wave  
theory and ray theory to describe phenomena resulting from the propagation of waves The book is divided into three parts  
Elastic continua Waves and rays and Variational formulation of rays In Part I continuum mechanics are used to describe the  
material through which seismic waves propagate and to formulate a system of equations to study the behaviour of such  
material In Part II these equations are used to identify the types of body waves propagating in elastic continua as well as to  
express their velocities and displacements in terms of the properties of these continua To solve the equations of motion in  
anisotropic inhomogeneous continua the high frequency approximation is used and establishes the concept of a ray In Part III  
it is shown that in elastic continua a ray is tantamount to a trajectory along which a seismic signal propagates in accordance  
with the variational principle of stationary travel time      **Catalogue** Bailey Brothers,1887      Catalog of Copyright Entries.

Engineering and Information Sciences Innovations and Advanced Techniques in Computer and Information Sciences and  
Engineering includes selected papers from the conference proceedings of the International Conference on Systems  
Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on  
Computer Information and Systems Sciences and Engineering CISSE 2006 All aspects of the conference were managed on  
line not only the reviewing submissions and registration processes but also the actual conference Conference participants  
authors presenters and attendees only needed an internet connection and sound available on their computers in order to be  
able to contribute and participate in this international ground breaking conference The on line structure of this high quality  
event allowed academic professionals and industry participants to contribute work and attend world class technical  
presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time

out of the office Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session
