The New York Times Index, 2007 **Beijing Review**, 2009 *New Car Buying Guide, 2004-2005* Consumer Reports, Consumer Reports Books Editors, 2004-06 Since its first auto test 50 years ago Consumer Reports has become the No 1 source that car buyers turn to when buying a new or used vehicle USA Today Consumer Reports is the definitive authority on unbiased automotive ratings *Black Newspapers Index*, 2006 **The Guardian Index**, 2002 *Britannica Year in Review 2002* Encyclopedia Britannica, 2003 **The Autistic Spectrum** Jill Boucher, 2008-11-13 The author of this excellent new book states in the preface that she intended to provide an account of autism that people with little or no specialist knowledge will find comprehensible and digestible but which at the same time offers more advanced readers a clear summary of existing knowledge In my opinion she has achieved her stated goal in a most impressive volume which does justice to the complexity of the subject covered without being over long or alienating the less knowledgeable reader This is no mean feat as the book covers topics as disparate as the potential genetic cause of autism and the principle of inclusive care as applied to people with autism The result is a handbook which I would have no hesitation in recommending to an intelligent parent of a child with autism a teacher and undergraduate student or a clinical trainee In fact I feel that this book has something to offer even a supposed expert in the study of autism since it so neatly synthesises historic and current understanding of the condition a thoughtfully written book which makes a modern through and readable account of a complex and intriguing condition Autism This is an authoritative accessible and original approach to our current understanding of autistic spectrum disorders Rita Jordan PhD Emeritus Professor in Autism Studies University of Birmingham Jill Boucher is a leading academic and clinician who brings an individual and authoritative perspective to the autism field In this book she does an excellent job of communicating a broad range of practical as well as theoretical issues to a general audience making up to date information about this puzzling condition accessible to a wide readership Boucher's book is a welcome and unique addition to the literature Tony Charman Professor of Neurodevelopmental Disorders University College of London What are the historical foundations of autism and what precisely is meant by the autistic spectrum How can we explain behavioural patterns of people with autism young or old and what are the major theoretical bases for understanding these What is the latest thinking regarding diagnosis and what are the most effective strategies for assessment education and care for people with this condition This provocative new text sets out to answer these questions It charts developments in understanding the nature and causes of autistic spectrum disorders guiding students through theories at the psychological neurobiological and first cause levels to methods of assessment intervention education and support Written as an introductory text for those with little prior knowledge of autism but also as a source of basic information and references for those already familiar with the field this book will be invaluable for a broad range of vocational and academic students and for parents and professionals who want an account of current facts and theories Jill
