**The Summer Slide** Karl Alexander, Sarah Pitcock, Matthew C. Boulay, 2016 This book is an authoritative examination of summer learning loss featuring original contributions by scholars and practitioners at the forefront of the movement to understand and stem the summer slide. The contributors provide an up to date account of what research has to say about summer learning loss the conditions in low income children s homes and communities that impede learning over the summer months and best practices in summer programming with lessons on how to strengthen program evaluations. The authors also show how information on program costs can be combined with student outcome data to inform future planning and establish program cost effectiveness. This book will help policymakers school administrators and teachers in their efforts to close academic achievement gaps and improve outcomes for all students. Book Features Empirical research on summer learning loss and efforts to counteract it. Original contributions by leading authorities. Practical guidance on best practices for implementing and evaluating strong summer programs. Recommendations for using program evaluations more effectively to inform policy. Contributors: Emily Ackman, Allison Atteberry, Catherine Augustine, Janice Aurini, Amy Bohnert, Geoffrey D. Borman, Claudia Buchmann, Judy B. Cheatham, Barbara Condliffe, Dennis J. Condron, Scott Davies, Douglas Downey, Ean Fonseca, Linda Goetze, Kathryn Grant, Amy Heard, Michelle K. Hosp, James S. Kim, Heather Marshall, Jennifer McCombs, Andrew McEachin, Dorothy McLeod, Joseph J. Merry, Emily Milne, Aaron M. Pallas, Sarah Pitcock, Alex Schmidt, Marc L. Stein, Paul von Hippel, Thomas G. White, Doris Terry, Williams, Nicole Zarrett. A comprehensive look at what s known about summer s impact on learning and achievement. It is a wake up call to policymakers and educators alike. Jane Stoddard Williams Chair, Horizons National. Provides the reader with everything they didn t know about summer learning loss and also provides information on everything we do know about eliminating summer learning loss. Do your school a favor and read this book and then act upon what you have learned. Richard Allington, University of Tennessee.

*How to Make Decisions with Different Kinds of Student Assessment Data* Susan M. Brookhart, 2015-12-07 In *How to Make Decisions with Different Kinds of Student Assessment Data* best selling author Susan M. Brookhart helps teachers and administrators understand the critical elements and nuances of assessment data and how that information can best be used to inform improvement efforts in the school or district. Readers will learn What different kinds of data can and cannot tell us about student learning. What different analyses reveal about changes in student achievement. How to interpret use and share relevant data and How to create a model to go from problem to solution in a data based decision making process. With easy to understand explanations supplemented by examples and scenarios from actual schools this book offers a path to better understanding more accurate interpretation of assessment results and most important more effective use of data to improve teaching and learning.

**Student Assessment** Debra J. Dirksen, 2013-11-01 When playing video games players are able to press the reset button when something goes wrong and realize they are missing an essential skill needed to win the game. In education we can use formative assessment as a means

for the student to press the virtual reset button Educators can ensure that students gain the skills needed to be successful learners in their classroom In this book the author provides strategies and techniques such as the use of graphic organizers quick writes and journaling to be used as formative assessments Specific information about each tool and recommendations for data analysis and implementation are provided helping teachers to implement formative assessment effectively and efficiently and allow their students to preset the reset button and master the skills they need to be successful in the classroom

North Carolina Linking Study Northwest Evaluation Association, 2014 Recently the Northwest Evaluation Association NWEA completed a study to connect the scale of the North Carolina State End of Grade EOG Testing Program used for North Carolina's mathematics and reading assessments with NWEA's Rausch Interval Unit RIT scale Information from the state assessments was used in a study to establish performance level scores on the RIT scale that would indicate a good chance of success on these tests To perform the analysis we linked together state test and NWEA test results for a sample of 18 730 North Carolina students who completed both exams in the spring of 2013 the term in which the EOG is administered For the spring season labeled current season an Equipercentile method was used to estimate the RIT score equivalent to each state performance level For fall labeled prior season we determined the percentage of the population within the selected study group that performed at each level on the state test and found the equivalent percentile ranges within the NWEA dataset to estimate the cut scores For example if 40% of the study group population in grade 3 mathematics performed below the proficient level on the state test we would find the RIT score that would be equivalent to the 40th percentile for the study population this would not be the same as the 40th percentile in the NWEA norms This RIT score would be the estimated point on the NWEA RIT scale that would be equivalent to the minimum score for proficiency on the state test Documentation about this method can be found on our website Table Sets 1 and 2 show the best estimate of the minimum RIT equivalent to each state performance level for same season spring and prior season fall RIT scores These tables can be used to identify students who may need additional help to perform well on these tests Table Sets 3 and 4 show the estimated probability of a student receiving a proficient score on the state assessment based on that student's RIT score These tables can be used to assist in identifying students who are not likely to pass these assessments thereby increasing the probability that intervention strategies will be planned and implemented These tables can also be useful for identifying target RIT score objectives likely to correspond to successful or proficient performance on the state test Table 5 shows the correlation coefficients between Measured Academic Performance MAP and the state test in each grade These statistics show the degree to which MAP and the state test are linearly related with values at or near 1 0 suggesting a perfect linear relationship and values near 0 0 indicating no linear relationship Table 6 shows the percentages of students at each grade and within each subject whose status on the state test i e whether or not the student met standards was accurately predicted by their MAP performance and using the estimated cut scores within the current study This table can be used to understand

the predictive validity of MAP with respect to the EOG [NWEA FAQ](#) Northwest Evaluation Association,2015 Northwest Evaluation Association NWEA conducts norming studies every several years to provide the best and most up to date information we can about student achievement and growth to better support educational decision making It is an important part of our commitment to our partners The most recent NWEA norms were released in July 2015 Just as we expect student performance to change with time norms of student performance will change correspondingly For 2015 several factors may have influenced how the US school age population performed on Measures of Academic Progress MAP assessments of language usage mathematics and reading over the 2011 12 2012 13 and 2013 14 school years Prominent among these possible factors are the introduction of Common Core instruction and Common Core versions of MAP But as with all empirical studies changes in scope and data necessitated changes in statistical design and analyses The methodological improvements introduced in the 2015 norms have resulted in a set of norms that are more representative of the US school age population than previous NWEA norms Methodological changes involved differences in the way post stratification weights were developed and the way growth was modeled Details of these changes are addressed more thoroughly in the 2015 Norms Study As a result of the improved methodology partners can expect some differences from previous norms as explained below [NWEA MAP TEST PREPARATION - GRADE 4 READING](#).
