Santiago,2018-12-07 Global economic recovery in the aftermath of the Great Recession has not been experienced equally

while the share of wealth owned by the richest 3% has grown the share owned by the poorest 90% continues to decline as

reported by Oxfam in 2016 This wealth divide disproportionately affects racial and ethnic minority communities This book

underscores the importance of financial capability and asset building FCAB practice policy and research during a period

when vulnerable populations face increasingly difficult economic and financial realities At the same time retrenchment and

privatization of government sponsored social services have eroded the safety net available for families experiencing poverty

or near poverty conditions The proliferation of products and services available from both formal and informal financial

institutions highlights the need to promote FCAB to avoid and or recover from financial difficulties crises and poverty The

contributors to this volume disseminate findings from interventions designed to increase financial knowledge financial

management and financial access across several vulnerable populations including immigrant communities Further they

demonstrate the need for culturally sensitive FCAB service delivery considering opportunities and barriers posed by past and

current life situations experiences and environments experienced by different populations The book is aimed at policymakers

Determinants of Economic Growth in Ethiopia. A Vector Correction Model Asmamaw Kassahun Agdew,2019-10-07

Thesis M A from the year 2016 in the subject Economics Case Scenarios grade 3 89 language English abstract The main

objective of this study is to investigate the macroeconomic determinants of economic growth in Ethiopia from 1974 2014 A

Vector Error Correction Model VECM to cointegration approach is applied in order to investigate the long run and short run

relationship between real GDP and its macroeconomic determinants The finding of the cointegration test shows that there is

a stable long run relationship between real GDP gross domestic saving labor human capital export FDI foreign aid and

external debt The long run empirical result reveals gross domestic saving human capital proxied by government expenditure

on health and education and labor force have positive and significant relationship with real output However export and real

GDP have positive but insignificant relationship External debt foreign aid and FDI have negatively significant relationship

with real GDP during the study period The short run dynamic results shows that human capital saving and FDI have positive

relationship with output growth whereas labor export aid and external debt have negative relationship with Real GDP The coefficient of equilibrating error term ECM suggests that the speed of adjustment feedback effect towards the long run equilibrium takes few years for full adjustment when there is a shock in the system In order to sustain long run growth the government or policy makers should design appropriate policies that results in the efficient use of resources contributing to economic growth and proper management of variables resulting to negative growth in order to reverse their effect on output

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2013 **Imprint of Action** Krijn H. J. Boom, 2018 Cultural heritage which includes archaeology is recognized as serving an increasingly important role in European societal development But what exactly is the relevance of archaeology to present day citizens Imprint of Action investigates the sociocultural impact of archaeology through public activities These activities provide an ideal setting for research as they represent a structured point of encounter between the public and archaeological heritage in analysing them aspects of people s connections to the past are revealed As such this research forms an integral part of the NEARCH project 2013 2018 As a basis for analysis survey data from three large scale case studies DOMunder Netherlands You R Archaeology Cross Europe and Invisible Monuments Greece was used The analysis and interpretation of the case studies is based on a newly created methodological framework which finds its roots in the broader culture and arts sector Results shows that activities encourage participation and interaction which engenders sociocultural impacts on participants most notably in knowledge increase skill development social relations and happiness Imprint of Action is the first large scale study focussing entirely on sociocultural impact in archaeology and as such is explorative in nature it provides unique insights into the workings of interaction and participation in archaeological events and openly shares qualitative and quantitative research data with the expanding field In doing so Imprint of Action lies the foundations for further analysis of the societal impact of both large and small scale heritage projects and identifies the incontestable values of archaeological heritage to the public **The**

European debt crisis and its effects on Germany's economic competitiveness Christian Tschäbunin, 2017-08-01 For Germany as a strongly export oriented economy competitiveness on the international markets is of critical importance for its wealth and economic growth A loss of competitive advantages could therefore severely affect the German economy The aim of this book is to answer the question if and in what way this threat affected Germany s economic competitiveness during the European debt crisis The results will then be used to further define the publicly dominant disadvantages as well as possible advantages for Germany as a consequence of the crisis In the end the book also has the objective to give policy recommendations for the euro crisis from a German perspective The results can subsequently contribute to the discussion whether Germany s current policy is really without any alternative In order to achieve the overall research goal a combination of literature review and comprehensive data analysis is used First of all to provide a first pillar of contextual background for the following analysis an overview of the development and causes of the European debt crisis is given by

referring to existing literature Also this section presents the financial and economic consequences of the described events in a graphical manner Secondly to construct the second pillar of conceptual framework the term economic competitiveness is defined by a comprehensive literature review Emphasis is put upon the concept of ability to sell and the measurement method of the country rankings while a short overview of other concepts is also provided Finally in combining theory and practice an in depth data based analysis of the development of Germany s economic competitiveness is given With the help of various publicly available data sources Germany s ability to sell and other competitiveness metrics are tracked and elaborated on over the last centuries with a special emphasis on the timeframe of the European debt crisis Furthermore comparisons to other countries are made to emphasize characteristics unique to Germany Ultimately the results of the analyses are evaluated and concluded in a short discussion about Germany s current policy in the euro crisis In this book the European debt crisis the role of Germany competitiveness prosperity ability to sell Voluntourism as a Business Concept. Organisational Objectives, Product Range, Realisation as well as Economic and Social Impacts in the Target Regions Marja Elisat,2025-01-02 Bachelor Thesis from the year 2021 in the subject Business economics Market research grade 1 0 University of Applied Sciences D sseldorf Betriebswirtschaft language English abstract The trend of sustainability fairness and quest for meaning can also be seen in tourism People are looking for social engagement and a deeper meaning for their holidays The tourism industry has long since reacted to this desire As a niche market voluntourism constitutes an alternative to mass tourism and has recorded a high quantitative and qualitative dynamism since the beginning of the 21st century An increasing number of tourism providers see a viable economic potential in voluntourism As a hybrid form of international voluntary service and tourism it is designed as a bookable touristic offer and marketed within a competitive sector although it is intended to serve a charitable purpose The programmes which were originally small scale are marketed commercially by professional tourism operators Thus being adapted to market principles and controversial basic elements such as the adventure of the holidays on the one hand and the meaningful work on the other Consequently this trend reflects touristification and commercialisation This thesis will explore voluntourism from a different angle by studying the various providers in the German market and their business concepts regarding their product ranges marketing and realisation

Socio Economic Impacts of Urban Expansion on Peri-Urban Communities. The Case of Gondar city Yeshiwas Tigabu Alemineh,2021-07-27 Examination Thesis from the year 2021 in the subject Sociology Economy and Industry grade Very Good University of Gondar social science course sociology language English abstract The general objective of this study is to examine the impacts of urban expansion on peri urban farming households of Gondar city to describe the means of livelihood changes of farmers after their land was expropriated Furthermore to describe the sustainable livelihoods of peri urban households after land expropriation to explain the social problems of evicted people resulted from city expansion and to explain the actual implementation of policies and strategies in ensuring sustainable livelihood of evicted households It is

obvious that urbanization has positive effects for countries development The growth of cities and towns is considered as one of the process of development Since cities are place of civilization generating economic development and social cultural spiritual and scientific advancements they are assumed as center of opportunities These opportunities include advantages of employment access to urban services commerce transportation and schools and health services However uncontrolled urbanization in most developing countries negatively affects the natural environment and livelihoods of peri urban areas Urban development determine changes regarding the organization of places economic and social changes but these effects exceed the territorial barriers and generate a broad impact particularly for the surrounding rural communities Urban expansion is derived from two factors One is the rise of investment and economic development that leads peri urban areas to be given for factories constructions or other investment sectors The second factor for urban expansion is population growth of the urban places which may rise from natural growth and rural to urban migration Parliamentary Debates.
