CHAPTER 1 CRITICAL THINKING, CLINICAL JUDGMENT, AND THE NURSING PROCESS

AUDIO CASE STUDY

Jane Practices Clinical Judgment

1. Identify and analyze cues; prioritize hypotheses; generate solutions; take action; evaluate outcomes; repeat.
2. Jane was exhausted, failed a test, and was pulled in too many directions. She was also crying in her car and had poor study habits and not enough sleep.
3. Jane's resources included a good friend, sick time from work, and wasted time between classes that she could better utilize. Your resources will be different, but they exist!
4. Critical thinking—the *why*: Jane uses critical thinking to determine why her current plan isn't working. She thinks honestly about her poor study habits, her time-management problems, and the impact this is having on her and her family.

Clinical judgment—the *do*: Jane uses her thinking to develop and carry out a plan that uses her resources and provides more productive study time and more quality time with her kids.

VOCABULARY

Nursing process

Definition: An organizing framework that links thinking with nursing actions. Steps include assessment/data collection, nursing diagnosis, planning, implementation, and evaluation.

Clinical judgment

Definition: The observed outcome of critical thinking and decision making. A process that uses nursing knowledge

CRITICAL THINKING AND CLINICAL JUDGMENT

Critical thinking and clinical judgment both follow a similar format. Both follow steps from collecting data to determining problems and outcomes, developing and taking actions, and evaluating outcomes. However, critical thinking helps you think about the problem: *What is it? Why is it happening?* And clinical judgment leads you to *do* something to manage the problem.
