**The Five Series Study** Institute of Medicine, Medical Follow-up Agency, Committee to Study the Mortality of Military Personnel Present at Atmospheric Tests of Nuclear Weapons, Heather O'Maonaigh, Harriet Crawford, William F. Page, Susan Thaul, 2000-04-02 More than 200 000 U S military personnel participated in atmospheric nuclear weapons tests between 1945 and the 1963 Limited Nuclear Test Ban Treaty. Questions persist such as whether that test participation is associated with the timing and causes of death among those individuals. This is the report of a mortality study of the approximately 70 000 soldiers, sailors and airmen who participated in at least one of five selected U S nuclear weapons test series in the 1950s and nearly 65 000 comparable nonparticipants the referents. The investigation described in this report based on more than 5 million person years of mortality follow up represents one of the largest cohort studies of military veterans ever conducted.

**NASCLA Commercial General Building Contractor Exam Prep** One Exam Prep, 2019-04-15 Test Taking Techniques Book Overviews Highlight and Tab Instructions Hundreds of Test Questions Math Review Test Scope Approved References Corporate Finance: Theory and Practice in Emerging Economies Sunil Mahajan, 2020-12-03 The book introduces corporate finance to first year students in business schools. Basic subjects such as marketing, human resources and finance are all fundamental to the learning of a business manager. A book on these subjects must emphasise learning that is conceptual in nature and at the same time application oriented. This book attempts to achieve this in a manner that is comprehensive and shorn of complexity. It examines the practice of finance without diluting theory and conceptual knowledge. Corporate finance is necessarily quantitative in nature and the book duly places emphasis on that aspect. It ensures the primacy of ideas and concepts utilising numbers as supportive elements.

*Biomedical Science Practice* Nessa Ahmed, Hedley Glencross, Qiuyu Wang, 2016 Biomedical scientists are the foundation of modern healthcare from cancer screening to diagnosing HIV from blood transfusion for surgery to food poisoning and infection control. Without biomedical scientists the diagnosis of disease, the evaluation of the effectiveness of treatment and research into the causes and cures of disease would not be possible. The Fundamentals of Biomedical Science series has been written to reflect the challenges of practicing biomedical science today. It draws together essential basic science with insights into laboratory practice to show how an understanding of the biology of disease is coupled to the analytical approaches that lead to diagnosis. Assuming only a minimum of prior knowledge the series reviews the full range of disciplines to which a Biomedical Scientist may be exposed from microbiology to cytopathology to transfusion science. A core text in the Fundamentals of Biomedical Science series, Biomedical Science Practice gives a comprehensive overview of the key laboratory techniques and professional skills that students need to master. The text is supported throughout with engaging clinical case studies written to emphasize the link between theory and practice providing a strong foundation for beginning biomedical science students.
