The Administrative Presidency: Presidential Directives and Executive Policymaking Michelle H.

Belco, 2026-01-01 The use of directives is as a valuable tool of the administrative presidency Less is known however about their use within the United States political system of separate and shared powers where presidents do not act alone Their directives may be in lieu of legislation or a request to Congress for support while the Supreme Court through their decisions may help or hinder executive action Meanwhile within their own separate institution presidents must rely on the federal bureaucracy to carry out their orders This book explores the use of directives to shape race policy within this framework Principally this book systematically examines the use of race related presidential directives executive orders memoranda and proclamations from Presidents Nixon to Biden and finds that presidents of both parties share more similarities than differences The expansive time frame of this book provides an opportunity to consider the origins of presidential policy on race to the Supreme Court's decision to end affirmative action in higher education which signaled the need for a significant shift in race policy moving forward

Becoming Weather Sarah Wright, 2024-09-17 Following a relational Indigenous led approach grounded in 25 years of collaborative work this book looks to weather and climate tracing the embodied emplaced and affective ways weather co constitutes people place and time's raising critical questions of ethics politics and becoming Becoming weather leads the reader through a reflexive engagement with weather seeking to shed light on pressing issues around climate change and its entanglements from the body where contours of weather are intimately felt and known to the ways that agencies of weather are implicated in the construction of nations to global topologies of climate in justice Reflecting on deep and ongoing collaborative work undertaken with Indigenous led research collectives in Australia and the Philippines the book traces contours of response ability learning from weathery relationships to speak back to constructions of climate that see it as aer nullius belonging to no one and that deny ongoing responsibilities becomings and belongings The book aims to support more than human and relational understandings of weather that situate us all within an ethics of differential cobecoming and that demand attention to the connections that bind and co constitute The book is intended for those interested in thinking differently about weather and climate particularly those who feel an urgent dissatisfaction with mainstream responses and understandings It will be beneficial for those who would learn from weather from and with place in ways led by Indigenous scholars and their allies though an engaged reflexive more than human and ethnographic account It does not shy away from critical engagement nor the changes desperately needed to learn and unlearn to attend to positionalities and responsibilities and to engage with what it means to weather on unceded Indigenous land

Nicolas Rothen, Julia Simner, Beat Meier, 2015-07-24 Synaesthesia is a condition in which a stimulus elicits an additional subjective experience For example the letter E printed in black the inducer may trigger an additional colour experience as a concurrent e.g. blue Synaesthesia tends to run in families and thus a genetic component is likely However given that the stimuli that typically induce synaesthesia are cultural artefacts a learning component must also be involved Moreover there is evidence that synaesthetic experiences not only activate brain areas typically involved in processing sensory input of the concurrent modality synaesthesia seems to cause a structural reorganisation of the brain Attempts to train non synaesthetes with synaesthetic associations have been successful in mimicking certain behavioural aspects and posthypnotic induction of synaesthetic experiences in non synaesthetes has even led to the according phenomenological reports These latter findings suggest that structural brain reorganization may not be a critical precondition but rather a consequence of the sustained coupling of inducers and concurrents Interestingly synaesthetes seem to be able to easily transfer synaesthetic experiences to novel stimuli Beyond this certain drugs e.g. LSD can lead to synaesthesia like experiences and may provide additional insights into the neurobiological basis of the condition Furthermore brain damage can both lead to a sudden presence of synaesthetic experiences in previously non synaesthetic individuals and a sudden absence of synaesthesia in previously synaesthetic individuals Moreover enduring sensory substitution has been effective in inducing a kind of acquired synaesthesia Besides informing us about the cognitive mechanisms of synaesthesia synaesthesia research is relevant for more general questions for example about consciousness such as the binding problem about crossmodal correspondences and about how individual differences in perceiving and experiencing the world develop Hence the aim of the current Research Topic is to provide novel insights into the development of synaesthesia both in its genuine and acquired form We welcome novel experimental work and theoretical contributions e.g. review and opinion articles focussing on factors such as brain maturation learning training hypnosis drugs sensory substitution and brain damage and their relation to the development of any form of synaesthesia The Complete Library of American Phonograph Recordings Jerry Osborne, 1997 The complete library is the first attempt to provide the reader with a year by year compilation of every known record release of every possible type by every conceivable record label *AB Bookman's Weekly*, 1990 **Vend**, 1967-07 PRICE GUIDE TO RECORDS.
