World AIDS Day 2022: Putting ourselves to the test: achieving equity to end HIV Diego Ripamonti, Segundo Ramos León Sandoval, 2024-10-29

Since HIV was first identified in the early 1980s, we have had numerous scientific advancements to improve HIV prevention and treatment. However, there are still 38 million people currently living with HIV, and a proportion of them have developed Acquired Immunodeficiency Syndrome (AIDS). The main issue with HIV and AIDS is inequalities: the communities affected are disproportionately distributed among the Global South. World AIDS Day takes place every year on the 1st of December and was founded in 1988, making it the first global health day to be established. This year, the theme of World AIDS Day is equality. Tackling the inequalities surrounding HIV testing, prevention, care, and stigma among marginalized populations is the only way to not fall behind the targets of the third sustainable development goal of ending the HIV/AIDS epidemic by 2030.
