Howard Yeager,2024-03-31 On Monday Apple introduced updated 13 and 15 inch MacBook Air models powered by the company's newest M3 CPU. The new laptops according to Apple have 18 hours of battery life, quicker Wi-Fi and 1080p cameras that are crisper than before. The latest MacBook Air computers according to Apple include an improved 1080p camera, quicker Wi-Fi and a battery life of up to 18 hours. There has been no change to the design from previous versions. Unlike previous processors, the new M3 chip supports two external monitors, which is a significant gain. For a laptop to have two displays, the lid must be closed. If it's open, only one screen will be functional. This book is an easy-to-understand manual to help you navigate and master the features of the new MacBook Air With M3 Chip, with illustrations to help bring the instructions to life.
