#### Superior Performance

The Agilent Technologies 34401A multimeter gives you the performance you need for fast, accurate bench and system testing. The 34401A provides a combination of resolution, accuracy and speed that rivals DMMs costing many times more, 8½ digits of resolution, 0.0001% basic 20-bit dcV accuracy and 1,0000 readings/s direct to GPIB ensure you get results that are accurate, fast, and repeatable.

#### Designed for Benchtop

The 34401A was designed with your bench needs in mind. Functions commonly associated with benchtop operations, like continuity and diode test, are built in. A NIST feature allows you to measure load resistance and other load effects in your measurements. Other capabilities like min/max and

maximum and average off and other measurements make checkout with the 34401A faster and easier.

The 34401A gives you the ability to store up to 512 readings in internal memory. For trouble-shooting, a trending feature lets you concentrate on plotting your test results without having to constantly glance at the display.

#### Easy for System Testing

For systems use, the 34401A gives you faster data throughput than any other DMM in its class. The 34401A can send up to 1,000 readings/s directly across GPIB in user-friendly ASCII format.

You also get both GPIB and RS-232 interfaces as standard features. Multimeter Complete and Referenced Trigger signals are provided so you can synchronize to other instruments in your test system. In addition, a TTL output indicates Pass/Fail results for limit testing.

To ensure both forward and backward compatibility, the 34401A includes three command languages: GPIB, Agilent 34700A and Fluke 8440A (FLUKE), so you don't have to rewrite your existing test software. An optional rack mount kit is available.

#### Easier to Use

Commonly accessed attributes, such as functions, ranges, and resolution are selected with a single button press.

Advanced features are available using menu functions that let you optimize the 34401A for your applications.

The included Agilent TestLink software allows you to get your captured data to work easily, using PC applications such as Microsoft® Excel® or Word® to analyze, interpret, display, print, and document the data you get from the 34401A. You can specify the meter setup and take a single reading or log data to the Excel spreadsheet in specified time intervals. Programmers can use ActiveX components to control the DMM using SCPI commands. To find out more about TestLink, visit [www.agilent.com/Test/TestLink](http://www.agilent.com/Test/TestLink).

#### 1-Year Warranty

With your 34401A, you get full documentation, a high-quality test lead set, calibration certificate with test data, and a 1-year warranty, all for one low price.
