Addiction Control The Defect Of Addiction:

The Natural Method Eddy Nahmias, Thomas W. Polger, Wenqing Zhao, 2020-08-04 Prominent philosophers explore themes in the work of Owen Flanagan focusing on debates about the nature of mind the self and morality. Owen Flanagan's work offers a model for how to be a naturalistic and scientifically informed philosopher who writes beautifully and deeply about topics as varied as consciousness and Buddhism moral psychology and dreaming identity and addiction literature and neuroscience. In this volume leading philosophers Flanagan's friends, colleagues, and former students explore themes in his work focusing on debates over the nature of mind the self and morality. Some contributors address Flanagan's work directly, others are inspired by his work or methodology. Their essays are variously penetrating and synoptic, cautious and speculative. The contributors offer proposals for productive interdisciplinary research exploring consciousness, personhood, religious cognition, mental disorders, addiction, the narrative self, virtue, the social sciences, forgiveness, and comparative philosophy. The authors share a commitment to virtues exemplified in Flanagan's work: interdisciplinary inquiry, an optimistic temperament, and a willingness to change one's mind. Contributors: Jack Bauer, Patricia S. Churchland, Peggy DesAutels, George Graham, Philip J. Ivanhoe, Alasdair MacIntyre, Robert N. McCauley, Eddy Nahmias, Thomas W. Polger, Galen Strawson, Erife Tekin, Robert Van Gulick, David B. Wong, Wenqing Zhao.

Addiction Control David Lobo, 2015-01-06 People with an addiction do not have control over what they are doing, taking, or using. Their addiction may reach a point at which it is harmful. Here we will look at several dependencies and ways to overpower them. The Impact of Behavioral Sciences on Criminal Law Nita Farahany, 2011-02-20 This volume is essential reading for anyone interested in the ongoing genomics and neuroscience revolution and its implications for criminal law. Alternative Models of Addiction Hanna Pickard, Serge H. Ahmed, Bennett Foddy, 2015-12-07 For much of the 20th century, theories of addictive behaviour and motivation were polarized between two models. The first model viewed addiction as a moral failure for which addicts are rightly held responsible and judged accordingly. The second model, in contrast, viewed addiction as a specific brain disease caused by neurobiological adaptations occurring in response to chronic drug or alcohol use and over which addicts have no choice or control. As our capacity to observe neurobiological phenomena improved, the second model became scientific orthodoxy, increasingly dominating addiction research and informing public understandings of addiction. More recently, however, a dissenting view has emerged within addiction research, based partly on new scientific research and partly on progress in philosophical and psychological understandings of relevant mental phenomena. This view does not revert to treating addiction as a moral failure but nonetheless holds that addictive behaviour is fundamentally motivated by choice and subject to at least a degree of voluntary control. On this alternative model of addiction, addictive behaviour is an instrumental means to ends that are desired by the individual, although much controversy exists with respect to the rationality or irrationality of these

ends the degree and nature of the voluntary control of addictive behaviour and motivation the explanation of the difference between addictive and non addictive behaviour and motivation and lastly the extent to which addictive behaviour and motivation is correctly characterised as pathological or diseased This research topic includes papers in the traditions of neuroscience psychology philosophy law and social science that explore alternative understandings of addiction
