Admission For Unisa 2016:

Handbook of Open Universities Around the World Sanjaya Mishra,Santosh Panda,2025-06-27 The Handbook of Open Universities Around the World is the first collection to provide a comprehensive and critical overview of open universities internationally Over 80 open universities have been established across five continents to provide a distance orientated class inclusive and high quality education for learners left behind by existing formal systems for higher and continuing education and lifelong learning This mission has been continually reshaped by major developments in open education learning technologies and online social networking as well as by the evolution of specific concerns such as the massification of education employability financial trends artificial intelligence and development agendas on the regional national and global levels This landmark volume analyzes and reflects on the planning organization management pedagogic skilling and employability and accreditation dimensions of 47 open universities in relation to their national and institutional contexts the internationalization of education and the integration of advanced learning technologies Featuring contributions by internationally recognized scholars practitioners and educational administrators this authoritative resource provides insights into the business model finances operations instructional systems enrollment patterns learner supports quality assurance professional development and more of today s open universities Through historical trajectories institutional profiles case studies lessons learned and best practices this book provides rich analytical perspectives on the status and challenges of single mode distance learning universities as an educational phenomenon while unpacking the premise of openness itself This Handbook is primarily written for planners managers administrators instructional designers and teaching faculty at single mode distance teaching universities who are seeking to sustain their institutions in a period of rapid change government policymakers training organizations technology providers and education think tanks who are in need of authentic and research based information on technology enabled learning modeled by open universities around the world and graduate students teaching faculty and scholars who are affiliated with online and distance education learning design and technology higher education planning and management adult education and lifelong learning and education policy and future studies Chapter 54 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license Watch a stimulating discussion between the book s volume editors and Sir John Daniel and Professor Stephen Murgatroyd on YouTube

Sustainable Development Goals for Society Vol. 1 Godwell Nhamo,Muchaiteyi Togo,Kaitano Dube,2021-06-16 Written by 43 authors from Africa Europe and Latin America this book presents 19 topics addressing poverty in the context of Sustainable Development Goals SDGs leadership in implementing SDGs and SDGs in service delivery and local government As the world has gone past five years of implementing the 2030 Agenda for Sustainable Development and the intertwined 17 SDGs new opportunities in research continue to open up Hence documenting some of the initiatives put in place around the world regarding the

implementation of the SDGs is one of the aims of this publication. With 10 years remaining, the book further enhances the desire to scale up SDGs implementation. The selection of case studies from the selected regions also provides a balance in terms of how the SDGs are being rolled out for economic growth, environmental stewardship, and social protection. The ambition remains even with the challenge brought by the COVID-19 pandemic that preoccupied the whole of 2020, spilling over to 2021. There is no doubt that resources have been diverted, but the world must stay on the course to 2030 and beyond. Therefore, the book is relevant for several stakeholders, including academics, development partners, government officials, and other individuals that are involved in making sure no one is left behind in the lead to 2030. **Higher Education ICT**

Integration in Africa Ke Yu, Reuben Dlamini, 2024-08-21. This multidisciplinary edited volume examines higher education's ICT integration in Africa, contributing a new and inclusive change readiness framework to better understand how to manage ICT or other technological disruptions in resource-restrained contexts. Tackling ICT incorporation in HEIs from different levels, chapters document case studies from countries such as Uganda, South Africa, Rwanda, Eswatini, and Zimbabwe to demonstrate both the complexity of integration but also the successes it has enabled and under which conditions. The cases included in this book also exhibit better incorporation of both change content and process, while some cases also make explicit reference to other technology adoption models. Ultimately, the book highlights conceptual and empirical research to inform practices and policy development in Africa, improving multi-level success or change readiness in ICT incorporation in HEIs in Africa. Addressing various gaps in existing literature and proposing innovative solutions like the multilevel change readiness model, this book will therefore be of interest to scholars, researchers, and academics in the fields of higher education, ICT integration, and educational technology more broadly. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND 4.0) license.

Education and Elitism Conrad Hughes, 2021-04-26. *Education and Elitism* discusses polemical debates around privilege, private schools, elitist universities, equal access to education, and underlying notions of fairness. The overarching question that runs through the book is about the future of education worldwide: how can schools and universities tread the tightrope between access and quality? This book investigates the philosophical positions that characterize elitism and anti-elitism to establish three types: meritocratic, plutocratic, and cultural. These types of elitism and their counter positions are used as reference points throughout the book's analysis of successive educational themes. The conclusion leads to suggestions that bridge the worlds of elitism and egalitarianism worldwide. The book covers critical questions related to the sociology and philosophy of education with particular focus on contemporary disruptors to education such as the COVID-19 pandemic and protest movements for social justice. With an attempt to offer readers an objective overview, this book will be an excellent compendium for students, academics, and researchers of the sociology of education, education policy, and comparative education. It will also be of interest to school leaders, university provosts, and professionals working in curriculum
