## **Adsorption Technology For Air And Water Pollution Control:**

**Adsorption Technology for Air and Water Pollution Control** Kenneth E. Noll, 1991-10-18 This practical book is valuable for a diversity of applications in both air and water pollution Adsorption Technology usually deals with control of organic compounds such as VOCs pesticides phenolics and complex synthetic organics However it is also used to control certain inorganic compounds such as heavy metals reduced sulfur gases and chlorine Much original work including original figures *Pollution Control Technologies* Swatantra P. Singh, Karthik Rathinam, Tarun Gupta, Avinash Kumar

Agarwal, 2021-06-17 p This monograph is based on pollution control technologies available to deal with water and air pollution It includes removal of variety of pollutants including arsenic chromium uranium pesticides and arsenic from water using adsorption technique In addition this book deals with the sampling and removal of microplastics using various techniques The contents also focus on the role of membrane technology in water and wastewater treatment and particulate matter air pollution and its control techniques This volume will be a useful guide for researchers academics and scientists

Air Pollution Control Equipment H. Brauer, Y. B. G. Varma, 2012-12-06 This book has arisen directly from a course on Air and Water Pollution Control delivered by the first named author at the Technical University of Berlin Extractions of this course have been presented in Brazil Turkey and India It was at the Indian Institute of Technology of Madras where the first named author got in contact with Professor Varma who turned out to be a suggestive cooperative coauthor This book is addressed primarily to chemical environmental and mechanical engineers engaged in the design and operation of equipment for air pollution control But it will certainly be helpful to chemists and physicists confronted with the solution of environmental problems Furthermore it is intended as a text book for engineering courses on environmental protection The goal of the book is the presentation of knowledge on design and operation of equipment applicable to the abatement of harmful emissions into air The technology of air pollution control is of relatively young age but it has already achieved a high degree of performance due to the research and development work invested in the last decades in this field *Application of*

*Adsorbents for Water Pollution Control* Amit Bhatnagar, 2012-11-11 Among various water and wastewater treatment technologies the adsorption process is considered better because of lower cost simple design and easy operation Activated carbon a universal adsorbent is generally used for the removal of diverse types of pollutants from water and wastewater Research is now being directed towards the modification of carbon surfaces to enhance its adsorption potential towards specific pollutants However widespread use of commercial activated carbon is sometimes restricted especially in developing or poor countries due to its higher costs Attempts are therefore being made to develop inexpensive adsorbents utilizing abundant natural materials agricultural and industrial waste materials Use of waste materials as low cost adsorbents is attractive due to their contribution in the reduction of costs for waste disposal therefore contributing to environmental protection This e book explores knowledge on recent developments in adsorbents synthesis and their use in water pollution

control This handy reference work is intended for researchers and scientists actively engaged in the study of adsorption and the development and application of efficient adsorption technology for water treatment This e book covers a wide range of topics including modeling aspects of adsorption process and the applications of conventional and non conventional adsorbents in water remediation emphasizing sorption mechanisms of different pollutants on the adsorbents
