### Actuarial Exam Practice Problem Set 2

**About this problem set:** These are problems from Course 1/P actuarial exams that I have collected over the years, grouped by topic, and ordered by difficulty. All of the exams have appeared on the SOA website <http://www.soa.org/> at some point in the past, though most of them are no longer there. The exams are copy-righted by the SOA.

**Note on the topics covered:** This problem set covers discrete random variables (Chapter 2 of Hogg/Tanis).

**Note on the ordering of the problems:** The problems are loosely grouped by topic, and very roughly ordered by difficulty (though that ordering is very subjective). The last group of problems (those with triple digit numbers) are harder, either because they are conceptually more difficult, or simply because they require lengthy computations and may take two or three times as long to solve than an average problem.

**Answers and solutions:** I will post an answer key and hints/solutions on the course webpage, [www.math.wisc.edu/~hildebr/370](http://www.math.wisc.edu/~hildebr/370).
