Building a Normative Order in the South China Sea Tran Truong Thuy, John B. Welfield, Le Thuy Trang, 2019 The South China Sea where a number of great powers and regional players contend for influence has emerged as one of the most potentially explosive regions in the world today. What can be done to reduce the possibility of conflict, solve the outstanding territorial problems and harness the potential of the sea to promote regional development, environmental sustainability and security? This book with contributions from leading authorities in China, the Philippines, Vietnam, Australia, Singapore and the United States seeks to illuminate these questions.

Reducing the Mortality Gap in People with Severe Mental Disorders: the Role of Lifestyle Psychosocial Interventions Andrea Fiorillo, Maurizio Pompili, Mario Luciano, Norman Sartorius, 2019-10-15 Patients with severe mental disorders (SMD) including major depression, bipolar disorder, schizophrenia and related spectrum disorders have a reduced life expectancy of 10-25 years compared with the general population. This life expectancy gap is mainly due to the co-occurrence of many physical diseases such as hypertension, coronary heart disease, stroke, chronic obstructive pulmonary disease, tuberculosis, hepatitis and HIV. Factors contributing to the reduced life expectancy can be grouped into three main categories: a) factors related to the patient; b) factors related to clinicians and c) factors related to the health system. As regards the first group, patients with SMD often adopt unhealthy lifestyle behaviors including heavy smoking, reduced physical activity, sedentary behaviors, poor diet and alcohol or drug abuse, and are reluctant to seek for physical care with GPs and other medical specialists. Increasing the levels of physical activity, improving the dietary patterns and reducing the smoking habits of people with severe mental disorders represent a global health challenge and a public health priority. Until now, attempts made to reduce this mortality gap have acted at three different levels: health system level, physician level and patient level. The third level interventions include electronic alerts through smartphones and web-based platforms, intensive case management, promotion of healthy habits, complex psychosocial interventions. Several population-based studies have shown that lifestyle behaviors are amenable to change through the adoption of specific psychosocial interventions. However, most clinical guidelines, although emphasizing the importance of health monitoring and regular check-ups for patients with severe mental illnesses, do not make specific recommendations on the provision of lifestyle interventions. These lifestyle-oriented interventions, consisting of behavioral, educational and psychological components, have been conducted mainly in research settings and have shown a good impact on patients' physical health. Despite this, their feasibility in routine settings has not been tested yet. It seems to be clinically and ethically relevant to develop, validate and carry out interventions to improve the lifestyle behaviors of patients with severe mental disorders to reduce the presence of comorbidities and to improve their life expectancy. In this Research Topic, we will summarize the available knowledge of the efficacy and effectiveness of psychosocial interventions aimed at improving healthy lifestyle behaviors and promoting the physical health of patients with severe mental disorders. Post-Traumatic Stress Jean Scandlyn,2017-07-05 When soldiers at Fort Carson were charged with a series of 14 murders PTSD and other invisible wounds of war were thrown into the national spotlight With these events as their starting point Jean Scandlyn and Sarah Hautzinger argue for a new approach to combat stress and trauma seeing them not just as individual medical pathologies but as fundamentally collective cultural phenomena Their deep ethnographic research including unusual access to affected soldiers at Fort Carson also engaged an extended labyrinth of friends family communities military culture social services bureaucracies the media and many other layers of society Through this profound and moving book they insist that invisible combat injuries are a social challenge demanding collective reconciliation with the post 9 11 wars **Brazil**

on the Global Stage Oliver Stuenkel,Matthew M. Taylor,2015-04-15 In the past generation Brazil has risen to become the seventh largest economy and fourth largest democracy in the world Yet its rise challenges the conventional wisdom that capitalist democracies will necessarily converge to become faithful adherents of a US led global liberal order Indeed Brazil demonstrates that middle powers even those of a deeply democratic bent may differ in their views of what democracy means on the global stage and how international relations should be conducted among sovereign nations This volume explores Brazil's postures on specific aspects of foreign relations including trade foreign and environmental policy humanitarian intervention nuclear proliferation and South South relations among other topics The authors argue from a variety of perspectives that even as Brazil seeks greater integration and recognition it also brings challenges to the status quo that are

emblematic of the tensions accompanying the rise to prominence of a number of middlepowers in an increasingly multipolar world system The International Stock Exchange Official Yearbook ,1990 Redesigning the Global Seed Commons Christine Frison,2018-11-08 There is much current controversy over whether the rights to seeds or plant genetic resources should be owned by the private sector or be common property This book addresses the legal and policy aspects of the multilateral seed management regime First it studies in detail the International Treaty on Plant Genetic Resources for Food and Agriculture the Treaty in order to understand and identify its dysfunctions Second it proposes solutions using recent developments of the theory of the commons to improve the collective seed management system of the Treaty a necessary condition for its member states to reach the overall food security and sustainable agriculture goals Redesigning the Global Seed Commons provides a significant contribution to the current political and academic debates on agrobiodiversity law and governance and on food security and food sovereignty by analyzing key issues under the Treaty that affect the design and implementation of regulatory instruments managing seeds as a commons It also examines the practical legal political and economic problems encountered in the attempt to implement these obligations in contemporary settings In particular it considers how to improve the Treaty implementation by proposing ways for Contracting Parties to better reach the Treaty's objectives taking a holistic view of the human seed ecosystem Following the tenth anniversary of the functioning the Treaty's multilateral system of access and benefit sharing which is currently under review by its Contracting Parties this book is well timed to examine recent developments in the field and guide the current review process to design a truly Global Seed Commons Index to Current Urban Documents ,1985 **The Continuing Study of Newspaper Reading** Advertising Research Foundation,1941 **Outlook on Agriculture** ,2015 *Union Catalog of Serials* University of Wisconsin--Madison.
