### 8B PRICE ELASTICITY OF DEMAND

#### Interpreting PED coefficients

Price elasticity of demand calculations can result in a range of results as follows:

| Calculation coefficient    | Interpretation               |
|----------------------------|------------------------------|
| $-\infty$ (minus infinity) | Perfectly price elastic      |
| Between $-\infty$ and -1   | (Relatively) price elastic   |
| -1                         | Unitary price elasticity     |
| Between 0 and -1           | (Relatively) price inelastic |
| 0                          | Perfectly price inelastic    |

You could draw yourself a number line to illustrate this visually if you like.
