### An Age of Accountability

John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

**The Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate** Stephen J. Ceci,Wendy M.

Williams,Shulamit Kahn,2018-04-20 There is no shortage of articles and books exploring women s underrepresentation in science Everyone is interested academics politicians parents high school girls and boys women in search of college majors administrators working to accommodate women s educational interests the list goes on But one thing often missing is an evidence based examination of the problem uninfluenced by personal opinions accounts of lived experiences anecdotes and the always encroaching inputs of popular culture This is why this special issue of Frontiers in Psychology can make a difference In it a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical objective approaches to understanding women s underrepresentation in science today The questions considered within this special issue span academic disciplines methods levels of analysis and nature of analysis what these article share is their scholarly evidence based approach to understanding a key issue of our time

**Biological Insulating Liquids** Ernst Peter Pagger,Norasage Pattanadech,Frank Uhlig,Michael Muhr,2023-03-01 This book describes the state of the art use of biological insulating liquids in detail In recent years more and more transformers filled with esters have been put into operation This is because people recognize the benefits of ester liquids in terms of their fire safety high flash and fire points and environmental characteristics judging from their biodegradability their low CO2 footprint only valid for natural ester and their beneficial interactions with solid insulation etc One of the main reasons is that the water adsorption and absorption characteristics of these liquids are excellent and very different compared to mineral oil The today s discussion about climate change and global warming is an additional driver for using natural ester Another advantage is that transformers filled with biological insulating liquids can operate with an overload of up to 150% This is advantageous in the case of volatile energy generation from wind and solar power and in the supply of electrical energy for electromobility Liquid inside electrical equipment is the lifeblood that serves both as a dielectric and a cooling medium Some properties of these liquids differ from mineral oil which had to be considered in the transformer design The dielectric liquid is always in direct contact with transformer materials therefore the interaction should be very well understood especially when retrofilling an existing

mineral oil filled device There are several natural ester fluids derived from various seeds and fruits on the market and their properties may differ more or less In the book the most important properties of the different biological insulating fluids and mineral oil are compared Ester fluids have already found their way into various standards The condition of the device can be verified very well from the contents of the insulating liquids For analysis and testing the same equipment and devices that are commonly used for mineral oil are used for ester liquid The chemical and physical behaviors of ester fluids compared to mineral oil are different This must always be considered when interpreting test results stemming from ester fluids The book is a guideline for students original equipment manufacturers users laboratories and authorities in the use of biological insulating liquids
