18 Self Scoring Emotional Intelligence Tests:

Emotional Intelligence and Leadership Styles Eniola O. Olagundoye, 2019 All around the world information technology is evolving at an alarming rate and it could be challenging keeping up with the growing changes that we are witnessing with it. This paper explored the relationship between emotional intelligence and leadership styles among information technology professionals. Does emotional intelligence predict leadership style and do leadership styles predict emotional intelligence components? A total of 185 participants were involved in this study. The leadership styles which are comprised of transformational, transactional, and passive avoidant were measured by the Multifactor Leadership Questionnaire (MLQ 5X) Bass, Avolio, 1995. The emotional intelligence components which are comprised of perception of emotion, managing own emotions, managing others' emotions, and utilization of emotion were measured by the Schutte Self Report Emotional Intelligence Test (SSEIT) Schutte et al, 2009. The demographic areas controlled in this study include gender, age, ethnicity, education, and tenure. Multiple regression was conducted on each of the seven hypotheses in this study and it was determined that transformational leadership style and transactional leadership style were predictors of perception of emotion, managing others' emotions, and utilization of emotion. This study also revealed that transformational leadership style was a predictor of managing own emotions. Surprisingly, transactional leadership style was not a predictor of managing own emotions. As expected, there was no significant correlation discovered between passive avoidant leadership style and emotional intelligence. Furthermore, the results showed that emotional intelligence was a predictor of both transformational and transactional leadership styles. This study discovered that gender was a significant variable and females scored higher than males in the emotional intelligence component of managing others' emotions. The findings in this study coincide with the body of literature that exists which revealed positive relationships between emotional intelligence components and transformational and transactional leadership styles.

Linking Emotional Intelligence and Performance at Work Vanessa Urch Druskat, Gerald Mount, Fabio Sala, 2013-04-15. In this edited volume, leading edge researchers discuss the link between Emotional Intelligence (EI) and workplace performance. Contributors from many areas such as social science, management, including organizational practitioners and psychologists have come together to develop a better understanding of how EI can influence work performance and whether research supports it. A unique feature of this book is that it integrates the work of social scientists and organizational practitioners. Their mutual interests in EI provide a unique opportunity for basic and applied research and practices to learn from one another in order to continually refine and advance knowledge on EI. The primary audience for this book is researchers, teachers, and students of psychology, management, and organizational behavior. Due to its clear practical applications to the workplace, it will also be of interest to organizational consultants and human resource practitioners.

Coaching in Communication Research Topçu, Çiçek, 2025-04-01. Coaching plays a crucial role in personal and professional development by fostering self-awareness, goal setting, and behavioral transformation. By

integrating methodologies such as Neurolinguistic Programming and the Gestalt approach coaching helps individuals reframe their perceptions unlock their potential and take meaningful action in the present moment This process enhances decision making creativity and emotional intelligence equipping individuals to navigate complex and uncertain environments with confidence As coaching continues to evolve it serves as a powerful tool for improving communication leadership and overall well being benefiting both individuals and organizations alike Coaching in Communication Research explores how the coaching profession takes part in communication studies in different countries It evaluates the potential and possibilities of integrating coaching and communication studies Covering topics such as emotional literacy body language and professional relationships this book is an excellent resource for communication scientists coaching professionals body language analysts professionals researchers scholars academicians and more

Since the release of the very successful first edition in 2001 the field of emotional intelligence has grown in sophistication and importance Many new and talented researchers have come into the field and techniques in EI measurement have dramatically increased so that we now know much more about the distinctiveness and utility of the different EI measures There has also been a dramatic upswing in research that looks at how to teach EI in schools organizations and families In this second edition leaders in the field present the most up to date research on the assessment and use of the emotional intelligence construct Importantly this edition expands on the previous by providing greater coverage of emotional intelligence interventions As with the first edition this second edition is both scientifically rigorous yet highly readable and accessible to a non specialist audience It will therefore be of value to researchers and practitioners in many disciplines beyond social psychology including areas of basic research cognition and emotion
