Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers, complete name, location, years active, type, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger carrying vehicles on at least two but no more than eight wheels of any design, either mass produced or built as one-off specials, experimental cars, prototypes or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered. Companies that built only trucks, buses, racing cars or motorcycles are not included. My First Forty Cars, Nelson Bolan, 2015-08-31 With a grandfather who drove a horse car in 1900 and who later had a 25 year career as a chauffeur for a wealthy family, Nelson Bolan has a unique viewpoint about the automotive industry during the first half of the 20th century. In later years, Bolan began his own car acquisitions. His first, a 1929 Chevrolet, was purchased for 100 in celebration of his brother's safe return from World War II and his own high school graduation. It had an outside gasoline gauge and if the driver forgot to read the gauge before getting into the driver's seat, he had no way of knowing how much fuel he had. Chevrolet made the change to dashboard gauges in 1930. The car also had actual wooden floor boards which were removed and reinstalled easily when servicing was necessary. This automotive memoir includes a chapter for each of Bolan's first forty cars, including photographs of the actual vehicles where possible. Most were well aged at the time of purchase; the earliest was a 1917 Dodge Brothers. A nostalgic but factual recollection of each car in the order it was acquired, the book
