

4.20.2 Operation

4.20.2.1 Motor operation

At low speed (swash plate at max. angle)

ZX135-1002054

- Travel speed selection solenoid valve is degaussed and pressure oil from the hydraulic pump does not flow into port D.
- As a result, regulating valve (9) is pushed to the left by spring (10).
- As a result, regulating valve (9) cuts off main pressure oil between control valve and end cover by pushing check valve (34).
- Pressure oil in control chamber is drained to the motor casing via passage b of the regulating valve (9).
- As a result, pressure oil from chamber c pushes swash plate (14) towards the max. angle direction in order to slow down travel speed and motor capacity becomes the maximum.
