Rouse, 2023 We seem to be stuck staring at insurmountable challenges The pandemic is the opening act for climate change and we need to get much better at anticipating and preparing for these types of challenge Simply rebuilding bridges once they fall or houses once they are swept away is both expensive and risks human lives Anticipation and preparation costs more now but is much less costly over time Of course spending now to save later is not a dominant American tradition We have managed or at least reacted to the Aids epidemic 1981 2013 Internet bubble bursting 2001 the real estate bubble bursting 2007 the opioid epidemic 2017 forest fires on the West Coast 2018 and the coronavirus pandemic 2020 Very recently we have experienced the fall of Afghanistan 2021 the latest earthquake and hurricane in Haiti 2021 and the attack on Ukraine 2022 Various earthquakes hurricanes and recently cicadas but fortunately not locusts have been sprinkled throughout Beyond Quick Fixes steps back from business as usual to rethink how we can approach the complex challenges of contemporary society health education energy and social media Rouse retreats initially into the principals of design thinking rather than policy making he rigorously reconsiders our typical modes of operation and explores alternative ways of thinking about complex problems and potential solutions The result is an integrated approach to addressing complexity to assist leaders and advisors responsible for addressing these challenges
