

1 Inspect/Place

Ensure the following items are inside the box:

- User's Manual
- Safety Manual
- Warranty Registration Card

Notify the Reseller if damage is found. (Please fill out the Warranty Registration Card, or fill out an on-line form at www.apc.com, to obtain warranty coverage.)

Place the UPS:

- Provide 5 cm clearance at the top and sides for adequate airflow around the UPS.
- Avoid direct sunlight.
- Avoid excessive heat.
- Avoid excessive humidity or liquids.
- Avoid excessive dust.

3 Power On

Press the ON/OFF switch to power the unit ON. A single short beep and the green "Power On" indicator confirms that Back-UPS ES is on and ready to provide protection.

The Back-UPS ES should charge for at least 16 hours to ensure sufficient runtime. The unit is being charged whenever it is connected to utility power.

2 Connect Equipment

Plug the Back-UPS ES power cord directly into a wall outlet, not a surge protector or power strip.

Battery Back-up plus Surge Protection

These outlets are powered whenever the Back-UPS ES is switched ON. During a power cut or other utility problems (low and high voltages), these outlets will be powered for a limited time by the Back-UPS ES. Plug your computer and monitor into these outlets.

Surge Protection Only

This outlet provides full-time protection from surges even if the Back-UPS ES is switched OFF. Plug your printer, fax machine, scanner, or other peripheral that does not need battery power into this outlet.

Status Indications

The Back-UPS ES indicates operating status using a combination of visual and audible indications.

Status LED	Audible Indication	Status	Alarm Sensitivity When
Green	None	On (Low) - UPS is supplying power from utility or battery to the connected equipment.	None
Amber	4 beeps every 40 seconds	On (Blinking) - UPS is connected to utility power, but no equipment connected to the battery outlets.	None (UPS is turned off, or when the UPS is turned on)
Amber	Constant Beep, Beep-Beep	Low (Blinking) - UPS is supplying battery power to the connected equipment and the battery is near exhaustion.	None (UPS is turned off, or when the UPS is turned on)
Amber, Flashing	Beep-Beep-Beep	Medium - UPS is supplying battery power to the connected equipment.	None (UPS is turned off, or when the UPS is turned on)
Red	Beeps for 1 minute every 5 hours	Magnitude Battery - indicates the battery fails soft fail.	None (UPS is turned off, or when the UPS is turned on)
Red	Constant - None	Overloaded - Occurs when one or more of the battery powered outlets is overloaded.	None (UPS is turned off, or when the UPS is turned on)

See the Troubleshooting section for additional assistance.

Order Replacement Battery

Replace with an APC qualified battery. Replacement batteries can be ordered from APC Global Services. Have your Back-UPS ES model number available when ordering. Your model number can be found on the bottom of the unit.

Transfer Voltage and Sensitivity Adjustment

In situations where the Back-UPS or connected equipment appears to sensitive to input voltage, it may be necessary to adjust the transfer voltage. This is very simple task requiring use of top panel Pushbutton. To adjust the transfer voltage proceed as follows:

1. Plug the Back-UPS into the utility power source. The back-UPS will be in a standby mode, no indicators lit.
2. Press the Top panel pushbutton fully inwards for 10 seconds. The LED will start glowing in a cyclic order GREEN- AMBER-RED. Indicating going in to programming mode.
3. The Back-UPS will then indicate the current sensitivity as shown in following table.

Indication	Sensitivity Setting	Input Voltage Range (per utility specification)	Use when
Green Flashing	LOW	100-280	Input voltage is extremely low or high. Not recommended for connected loads.
Amber Flashing	MEDIUM (factory default)	100-280	Back-UPS automatically goes On Battery
Red Flashing	HIGH	100-270	Connected equipment is sensitive to voltage fluctuations (plugs)

4. To select the low Sensitivity setting, Press the push button until the LED turns to GREEN Flashing
5. To select the Medium sensitivity setting, Press the push button until the LED turns to AMBER Flashing
6. To select the High Sensitivity setting, Press the Push button until the LED turns to RED Flashing.
7. The unit will exit from programming mode automatically after the sensitivity selection is done. The LED will start glowing in cyclic order GREEN-AMBER-RED twice indicating the Exit from the programming mode.
