Method And Madness:

Novel Sociological Methods and Practices of Engagement across Disability Communities Danielle Landry, Hannah Morgan, Temba Middelmann, Karen Soldatic, Robel Abay, 2025-11-12 Carol Thomas seminal work on the contested relations of and between the sociologies of health illness and disability has resulted in a plethora of critical insights into disabled people's sense of socio-political identity. This includes a growing body of critically engaged scholarship that has demonstrated the significance of working across interdisciplinary frames and transnational geographies in addition to crippling research practices in studies of the everyday experiences of disabled people and community members who live with longstanding chronic illnesses and undiagnosed health conditions. This research has to date enriched the disability sociological imagination generating new insights and potential alliances that are necessary to build, mobilize and sustain crosscutting communities of wellbeing. This Research Topic aims to explore innovative methods in sociological research that distill shared and mutually constitutive practices of wellbeing for disabled people and community members that live across the continuum of disability health identities. Research that seeks to connect the lived experiences of uniquely marginalized people with wider patterns of local and global inequity and relations of exclusion offers opportunities to advance goals of disability justice and improve accessibility in research work, healthcare delivery, advocacy and beyond. Centering disability in sociological methods has the potential to expose inequities and disrupt normative standards, systems and practices. By exploring the intersection of sociology, disability studies and other schools of thought and activism, this Research Topic will provide new empirical and methodological insight into interdisciplinary scholarship and collaborative action. The Research Topic aims to contribute to decentering the Global North in health and disability research and advocacy by incorporating insight from the Global South. Scholars from the Global South and research focused on transnational connections are encouraged. We invite empirical, analytic or theoretical papers exploring emerging sociological methods and practices of engagement across diverse disability communities, noting how communities of care are often transnational. We encourage generous and generative understandings of disability and seek contributions from scholars and community-based researchers in sociology, disability studies, political science, science and technology studies, anthropology, mad studies, Deaf studies and other disciplines that are considering these connections. This Research Topic welcomes critical and situated contributions from all geographies, especially including disabled scholars, scholars in the Global South and transnational collaborations towards more equitable global knowledge production. Submissions on various themes are encouraged, including: Interdisciplinary ruptures or points of convergence in methodologies related to disability, health and illness; Crippling research methods and modes of analysis; Innovations in research accessibility; Reflections on a disability lens for sociological methods; Diverse disability identities and practices of community engagement; Technological advancements in research engagement and dissemination. Karen Soldatic, Danielle Landry and Temba Middelmann are funded and supported by the Canada Excellence Research Chair in Health Equity and

Madness examines the French debate over crime and madness in the fin de siècle She argues that psychiatric theories of
human behaviour and new sociological interpretations of crime combined to undermine the traditional foundations of the
penal system and helped to shape the new science of criminology As a result traditional notions of free will and moral
responsibility were eroded as new and often draconian strategies evolved from managerial practices developed mainly by
medical men This book offers a detailed examination of the radical politique criminelle they devised Harris breaks down the
conventional boundaries between intellectual and social history by linking the often esoteric formulations of the professionals
to the defendants own mental anguish and emotional despair Both aspects were involved in developing the meaning of moral
and social responsibility in modern society She demonstrates how the debate over crime and madness aired during the
courtroom trials repeatedly touched on some of the most widespread anxieties of the era which focused on the politics of
gender and class Through a series of case studies she looks specifically at discussions of feminine hysteria and women's
