## Edexcel AS/A-level Geography 1

- Tectonic processes and hazards
- Glaciated landscapes and change
- Coastal landscapes and change

This Answers document provides suggestions for some of the possible answers that might be given for the questions asked in the Workbook. They are not exhaustive and other answers may be acceptable, but they are intended as a guide to give teachers and students feedback.

### Exam-style question answers

The answers given for exam-style questions of an explanatory or evaluative kind set out what is called 'indicative content guidance'. Just showing the examiner you are familiar with some or most of the content will not suffice. You need to demonstrate that you understand it and are willing and able to use it in a way that directly addresses the question. The indicative content shown for each question is not exhaustive. Questions may be approached in a number of different ways. The choice of approach is yours. Just make sure your approach answers the question.

Assessing whether or not the question has been answered is where 'levels marking' comes in. For questions with maximum marks of 6, 12 or 15, three levels of attainment are recognised. Where the maximum mark is 20, four levels are defined. The table below gives an idea of the descriptors that are used to determine the quality of an answer and the mark to be awarded.

Level	Descriptor	Mark (depending on maximum)
1	Demonstrates isolated elements of geographical knowledge and understanding.  Question not addressed.	1–2 (max. 6) 1–4 (max. 12) 1–5 (max. 15)
2	Demonstrates geographical knowledge and understanding — not always relevant or accurate.  Shows some awareness of the question.	3–4 (max. 6) 5–8 (max. 12) 6–10 (max. 15)
3	Demonstrates geographical knowledge and	5–6 (max. 6)
