**The Saturday Evening Post** ,1922    *The Continuing Study of Newspaper Reading Advertising Research*

Foundation,1939    *Payment Methods for Consumer-to-Consumer Online Transactions* David E. Sorkin,2008 Participants in eBay online auctions and other types of online transactions involving private individuals increasingly use PayPal or online payment services that enable individuals to make credit card payments to one another generally with the payment service acting as an intermediary Relatively little attention has been paid to the risks and potential liabilities that such services involve for buyers and sellers This Article compares online payment systems and similar intermediary services to traditional payment mechanisms in that context The Article concludes that making chargeback rights available for credit card based online payments would help balance transaction risks between buyers and sellers

**The Economics of Payment** Tobias Trütsch,2017 This thesis examines the impact of payment innovations such as contactless and mobile payment on individual payment behavior It consists of three empirical studies in the field of payment economics that fill the gap in this relatively new field Unique data sets on consumer payment choice provided by the Federal Reserve Bank of Boston are analyzed In addition the introductory chapter offers a comprehensive overview of the various strands of research on the factors driving consumer payment behavior It also extends literature by providing a theoretical model of individual payment behavior that draws together the reviewed literature In the first study the effect of contactless payment on the transaction ratio for different transaction types at the stationary point of sale POS is estimated The specific devices that are investigated are debit and credit cards to which the feature is embedded Using propensity score matching to control for selection the estimation shows that the contactless feature yields a statistically significant increase in the transaction ratio at the POS for both payment methods The average treatment effect on the treated for credit and debit cards is roughly 8% and 10% respectively These findings indicate that the private industry can benefit from the innovation with respect to additional revenue streams The second study explores the impact of contactless payment on cash usage in terms of value spending and transaction frequency at the POS The specific devices that are investigated are debit and credit cards to which the feature is embedded Employing cross sectional estimation methods the estimation shows that contactless payment leads to a statistically significant reduction in average cash usage at the POS in terms of value and volume The negative effect of contactless credit and debit cards on cash volume is 5% and 6% respectively The negative impact of contactless credit cards on cas
