*The Living Classroom* David Armington,1997 This book describes the special way one teacher Jeanette Amidon approaches children s thinking with a particular focus on reading and writing instruction The root value of her first grade classroom in Massachusetts is respect for children s ideas with the children s art and writing as visible signs of the teacher s respect for their thinking This teacher s example can be used to support the case for a broad cultural view of teaching in which teaching children is not only or mainly the challenge of imparting specific skills but rather a whole approach to living together as a small provisional classroom

community dedicated to the development of ideas Important points in Jeanette Amidon s approach include that children learn well from experiences in which they have a vital stake and some genuine interest that high quality learning involves authentic performance writing for example should be a means of saying something an individual wants or needs to say to some audience not a school exercise that a certain amount of curriculum should arise from a continuous reconstruction of experience generated by the ongoing activities of children that capitalizing on individual differences is important and that collective learning is powerful Following an introduction the book s chapters are 1 Jeanette s Classroom An Action Report by a Frequent Visitor 2 Learning to Talk in a New Language Children s Inventions as a Stimulus to Writing 3 A Lot on Their Minds A Closer Look at the Work of the Children 4 The Larger Picture We Talk with Jeanette about Children Learning and Teaching 5 Reflections and Epilogue Contains 32 annotated references EV *McGraw-Hills Conquering the GMAT Math and Integrated Reasoning, 2nd Edition* Robert E.
