Emergency Medical Responder: Your First Response in Emergency Care David Schottke, 2016-10-25 Previous editions published with title First responder your first response in emergency care *A Guide to Compliance for Process Safety Management/Risk Management Planning (PSM/RMP)* Frank R. Spellman, 1998-06-03 Establishing maintaining and refining a comprehensive Process Safety Management PSM and Risk Management Program RMP is a daunting task. The regulations are complicated and difficult to understand. The resources available to manage your program are limited. Your plant could be the target of a grueling PSM and RMP compliance audit by OSHA and or the EPA which could scrutinize your facility according to their stringent audit guidelines. Ask yourself some questions. Is your municipal plant or industrial facility ready to meet new OSHA and EPA PSM RMP regulations? Do you understand OSHA's and EPA's requirements? Do you know how OSHA/EPA are interpreting PSM/RMP requirements? Are you prepared for a possible audit? Is your existing PSM/RMP comprehensive, maintainable and cost effective? If you answered no to any of these you need the expert guidance provided by *A Guide to Compliance for Process Safety Management Risk Management Planning PSM RMP*. In recent years chemical accidents that involved the release of toxic substances have claimed the lives of hundreds of employees and thousands of others worldwide. In order to prevent repeat occurrences of catastrophic chemical incidents OSHA and the USEPA have joined forces to bring about the OSHA Process Safety Management Standard PSM and the USEPA Risk Management Program RMP. Chemical disaster situations can occur due to human error in system operation and or a malfunction in system equipment. Other emergency situations that must also be considered and planned for include fire, floods, hurricanes, earthquakes, tornadoes, snow, ice storms, avalanches, explosions, truck accidents, train derailments, airplane crashes, building collapses, riots, bomb threats, terrorism and sabotage. Be prepared. Determine the differences and similarities between OSHA's PSM and EPA's RMP regulations. Survey your facility to determine your needs. Plug your site specific data into regulation templates. Prepare your data records for your PSM compliance package. Calculate your Worst Case scenarios. Assemble a viable PSM program in a logical, sequential and correct manner. Supervise program implementation elements with the overall management system. This user friendly plain English, straightforward guide to new EPA and OSHA regulations describes, explains and demonstrates a tested, proven, workable methodology for installation of complete, correct safety and risk programs. It provides the public administrator, plant manager, plant engineer and organization safety professionals with the tool needed to ensure full compliance with the requirements of both regulations. Those with interests in HazMat response and mitigation procedures will also find it of use. This guidebook is designed to be applicable to the needs of most operations involved in the production, use, transfer, storage and processing of hazardous materials. It addresses Process Safety Management and Risk Management Planning for facilities handling hazardous materials and describes the activities and approach to use within U.S. plants and companies of all sizes.
