Key-words-in-context Title Index ,1962 MacArthur's Airman Thomas E. Griffith,1998 Thomas Griffith offers a critical assessment of George C Kenney s numerous contributions to MacArthur s war efforts He depicts Kenney as a staunch proponent of airpower s ability to shape the outcome of military engagement and a commander who shared MacArthur s strategic vision **Technological Revolution?** Gary McCulloch,Edgar William Jenkins,David Layton,1985 Catalogue, Books and Journals in Advanced Mathematics American Mathematical Society,1985 **Notices of the American Mathematical Society** American Mathematical Society,1984 Contains articles of significant interest to mathematicians including reports on current mathematical research **Drawing Futures** Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas Parliamentary Papers Great Britain. failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy Recent advances in mathematical programming Robert L.
