Assessment of the Developing Infant 2nd Edition presents theories of infant motor development and discusses the unique challenges involved in assessing the motor skills of developing infants as compared to that of adults. It provides step by step instructions for using the Alberta Infant Motor Scale (AIMS) a scale that measures infant gross motor skills. It also features a review of two current theories of motor development line drawings and photographs of 58 gross motor skills and a percentile graph to plot an infant's score and derive an estimate of his or her percentile ranking. Clinicians, researchers, and parents, caregivers have all reported satisfaction with both the ease of an AIMS assessment and the strong psychometric properties of the scale. Thus the descriptors of the 58 motor items and the administration and scoring guidelines have stood the test of time and remain unchanged in this second edition. Physical Therapy for Children - E-Book Robert J. Palisano, Suzann K. Campbell, Margo Orlin, 2014-04-25 Used as both a core textbook in PT programs and as a clinical reference Physical Therapy for Children 4th Edition provides the essential information needed by PTs both student and professional when working with children. Like the previous bestselling editions the 4th edition follows the practice pattern categories of the Guide to Physical Therapist Practice and uses the IFC model of the disabling process as it presents up to date evidence based coverage of treatment. In this latest edition Suzann Campbell DeLapp, Robert J. Palisano and Margo N. Orlin have added more case studies and video clips, additional chapters and Medline linked references online and Evidence to Practice boxes to make it easy to find and remember important information. Provides comprehensive foundational knowledge in decision making, screening, development, motor control and motor learning, the impairments of body function and structure, and the PT management of pediatric disorders. Reflects a family centered care model throughout to help you understand how to involve children and their caregivers in developing and implementing intervention plans. Emphasizes an evidence based approach that incorporates the latest research for the best outcomes. Follows the practice pattern guidelines of the Guide to Physical Therapist Practice 2nd Edition which sets the standard for physical therapy practice. Features the International Classification of Function, Disability and Health (ICF) of the World Health Organization WHO as the model for the disabling process, emphasizing activity rather than functional limitations and participation rather than disability. In keeping with the book's focus on prevention of disability, Provides extensive case studies that show the practical application of material covered in the text and are often accompanied by online video clips illustrating the condition and its management. Makes it easy to access key information with plenty of tables and boxes that organize and summarize important points. Clearly demonstrates important concepts and clinical conditions you'll encounter in practice with over 800 illustrations. Takes learning to a deeper level with additional resources on the Evolve website featuring Over 40 video clips that correspond to case studies and demonstrate conditions found in each chapter. Helpful resources including web links, Questions and exercises you'll find helpful when preparing for the pediatric specialist certification exam.

Documentation for Rehabilitation Lori Quinn, James Gordon (Ed.D.), 2010 In this textbook Quinn and Gordon provide a general approach to documentation that can be adapted to different settings for physical therapy students and professionals. They emphasize the concept that clinical reasoning is reflected in documentation and vice versa and that documentation is a framework for clinical decision making. They cover each documentation component and examples and exercises that relate to areas such as rehabilitation, women's health, health and wellness, orthopedics and acute care. This edition has been revised and expanded and includes new chapters on payment policy and coding, legal aspects, pediatrics and computerized documentation and incorporates the International Classification of Functioning, Disability and Health model.
