

# What is a Good Impact Factor for a Journal?

A journal impact factor is a metric that assesses the citation rate of articles published in a particular journal over a specific time – that's usually 2 years.

# Journal Impact Factor

**Tibor Braun**

## **Journal Impact Factor:**

**The Impact Factor of Scientific and Scholarly Journals** Tibor Braun, 2007      **Medinfo 2007** Klaus A. Kuhn, James R. Warren, Tze-Yun Leong, 2007 The papers presented are refereed and from all over the world They reflect the breadth and depth of the field of biomedical and health informatics covering topics such as health information systems knowledge and data management education standards consumer health and human factors emerging technologies sustainability organizational and economic issues genomics and image and signal processing As this volume carries such a wide collection it will be of great interest to anyone engaged in biomedical and health informatics research and application

**Multidimensional Journal Evaluation** Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011

*Scientific Writing for Impact Factor Journals* Eric Lichtfouse, 2013 Publish or Perish This old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country's competitiveness An often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated The necessity of optimally disseminating experts' findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of Impact Factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players This handbook presents the golden rules for publishing scientific articles In order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native French speakers publishing in English tips on how to make the style more academic or more general to fit your intended readership and in the book's closing section suggests new publishing techniques of the Internet age such as the micro article which allows researchers to focus their findings into a single innovative point The major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent CVs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge      *Does the Journal Impact Factor Help Make a Good Indicator of Academic Performance?* Sudhanshu K. Mishra, 2010 Is journal impact factor a good measure of research merit This question has assumed a great importance after the notification of the University Grants Commission Minimum Qualifications for Appointment of Teachers and other Academic Staff in Universities and Colleges and Measures for the Maintenance of Standards in Higher Education Regulations 2009 on September 23rd 2009

Now publication of research papers articles in reputed journals has become an important factor in assessment of the academic performance of teachers in colleges and universities in India One of the measures of reputation and academic standard rank or importance of a journal is the so called Impact Factor This study makes a detailed statistical analysis of Journal Impact Factors across the disciplines It finds that if journal impact factor is used to assess the academic performance of individuals for the purpose of selection promotion etc and it is not borne in mind that due to vast differences in the nature of distribution of impact factors across the disciplines they are not justifiably comparable a below average scholar in the one discipline will rank higher and will be honored and benefitted more than another scholar in some other discipline wherein the journal impact factor is adversely skewed It may be noted that in the university departments there are specializations with low impact factor journals and other specializations with very high impact factor journals But the teachers researchers of different specializations in the departments compete with each other for promotion In this milieu the researchers with an unfortunate specialization wherein the journal impact factor is mingy or adversely skewed would receive injustice is plainly predetermined Therefore a measure such as the h index which quantifies the quality as well as productivity of an individual author scholar would be more appropriate than the journal impact factor The h index may be fine tuned and hence the g index or Tol s index may be used Nevertheless even the h index and the Tol s index would not be appropriate to the purpose of inter disciplinary or inter specialization comparisons A more informed and balanced judgment of the expert committee for selection appointment and promotion purposes will continue to be extremely important

**A Guide to the Scientific Career** Mohammadali M. Shoja, Anastasia Arynchyna, Marios Loukas, Anthony V. D'Antoni, Sandra M. Buerger, Marion Karl, R. Shane Tubbs, 2020-01-09 A concise easy to read source of essential tips and skills for writing research papers and career management In order to be truly successful in the biomedical professions one must have excellent communication skills and networking abilities Of equal importance is the possession of sufficient clinical knowledge as well as a proficiency in conducting research and writing scientific papers This unique and important book provides medical students and residents with the most commonly encountered topics in the academic and professional lifestyle teaching them all of the practical nuances that are often only learned through experience Written by a team of experienced professionals to help guide younger researchers A Guide to the Scientific Career Virtues Communication Research and Academic Writing features ten sections composed of seventy four chapters that cover qualities of research scientists career satisfaction and its determinants publishing in academic medicine assessing a researcher s scientific productivity and scholarly impact manners in academics communication skills essence of collaborative research dealing with manipulative people writing and scientific misconduct ethical and legal aspects plagiarism research regulations proposals grants and practice publication and resources tips on writing every type of paper and report and much more An easy to read source of essential tips and skills for scientific research Emphasizes good communication skills sound clinical judgment knowledge of research methodology and good

**Research Methodology for Scientific Research, 2/E** K. Prathapan, 2022-12-01 K Prathapan is currently working as an Assistant Professor in the Post Graduate Department of Physics and Research Center Govt Brennen College Thalassery Kerala The author has published books like Analytical Problems in Classical Mechanics With Complete Solutions Quantum Mechanics An Interactive Textbook Classical and Quantum Mechanics Properties of Matter etc The author has 10 research papers to his credit published in various international journals

**Improved, extended, and total impact factor of a journal** Florentin Smarandache, 2020-08-01 In this short paper we recall the Garfield Impact Factor of a journal we improve and extend it and eventually present the Total Impact Factor that reflects the most accurate impact factor

**Scientific Writing for Impact Factor Journals** Eric Lichtfouse, 2013-01-01 Publish or Perish This old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country s competitiveness An often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated The necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of Impact Factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players This handbook presents the golden rules for publishing scientific articles In order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native French speakers publishing in English tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the Internet age such as the micro article which allows researchers to focus their findings into a single innovative point The major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent CVs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

**Science Dynamics and Research Production** Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity In the book statistical methods deterministic and stochastic models and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research

productivity and management of research groups and organizations The dynamics of science structures and systems is complex and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures The book has three parts The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations Part three contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative

Journal Impact Factor, Eigenfactor, Journal Influence and Article Influence Chia-Lin Chang,2012      **A Guide to Journal Citation Reports (JCR)** Azadeh Nemati,Majid Aghlmand,2013-08-09 A Guide to Journal Citation Reports JCR aims at explaining JCR completely The present book defines and gives information about Journal Title Total Cites Total Articles Cited Half Life Impact Factor Five Year Impact Factor Median Impact Factor Aggregate Impact Factor Immediacy Index Aggregate Immediacy Index Aggregated Cited Half Life Number of Journals in Category Number of Articles in Category      **Journal of the American Society for Information Science** American Society for Information Science,1997      *Writing Scientific Research Articles* Margaret Cargill,Patrick O'Connor,2009-04-20 Margaret Cargill s background as a linguist and research communications educator and Patrick O Connor s experience as both research scientist and educator synergize to improve both the science and art of scientific writing If the authors goal is to give scientists the tools to write and publish compelling well documented clear narratives that convey their work honestly and in proper context they have succeeded admirably Veterinary Pathology July 2009 The book is clearly written has a logical step by step structure is easy to read and contains a lot of sensible advice about how to get scientific work published in international journals The book is a most useful addition to the literature covering scientific writing Aquaculture International April 2009 Writing Scientific Research Articles Strategy and Steps guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer reviewed journals The book is designed for scientists who use English as a first or an additional language for research students and those who teach them paper writing skills and for early career researchers wanting to hone their skills as authors and mentors It provides clear processes for selecting target journals and writing each section of a manuscript starting with the results The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well written example papers Strategies are presented for responding to

referee comments as well as ideas for developing discipline specific English language skills for manuscript writing The book is designed for use by individuals or in a class setting Visit the companion site at [www.writersresearch.com.au](http://www.writersresearch.com.au) for more information

**Journal Impact Factor Versus Eigenfactor and Article Influence** Chia-Lin Chang,2010      **Becoming a Scholarly Journal Editor** Wayne Journell,2022-11-10

Along with the infamous Reviewer 2 journal editors are a leading cause of angst among scholars When editors are bad at their jobs careers are damaged reputations of journals suffer and the overall scholarship within a field is weakened Yet despite their importance to the practice of academia most editors do not receive any formal training on the editing process Even well published authors face a steep learning curve when navigating all of the moving parts of a scholarly journal and providing quality feedback to authors This book is intended to be a guide for scholarly journal editors It walks current and prospective editors through the various steps of the editing process including establishing an editorial vision creating editorial teams boards interpreting reviewers comments and writing decision letters and publicizing published articles and improving journal metrics A secondary goal of the book is to provide authors with a peek inside the process of journal editing By better understanding the decisions that editors make authors can make more informed choices about which journals they should submit their work as well as improve their chances for publication

Journal of Information Science ,2003 Principles practice      *Indian Journal of Malariology* ,1990      *How Robust are Journal Rankings Based on the Impact Factor? Evidence from the Economic Sciences* Christian Seiler,Klaus Wohlrabe,2014
