1. Move the cursor over each planet to learn its name. What are the four inner planets?

Mercury, venus, earth, and mars.

These planets are called **rocky planets** because their surfaces are rocky.

2. Click the “-” button (upper right) three times to zoom out. What are the names of the four **outer planets**?

neptune, uranus, saturn, jupiter.

These planets are called **gas giants** because they are essentially huge balls of gas.

3. Before 2006, while Pluto was still considered a planet, people used this saying to remember the nine planet names: “My very excellent mother just sent us nine pizzas.”

Come up with a new sentence to help remember the eight planet names, in order.

My Very Efficient Memory Just Summed Up Nine.
