In the *Cell Types* Gizmo, you will use a light microscope to compare and contrast different samples. On the LANDSCAPE tab, click on the ***Eelodea* leaf**. (Turn on **Show all samples** if you can't find it.) Switch to the MICROSCOPE tab to observe the sample as it would appear under the microscope. By default, this microscope is using 40x magnification.

1. Drag the **Coarse focus** slider until the sample is focused as well as possible. Then, improve the focus with the **Fine focus** slider. What do you see? I see a lot of cells grouped together.
2. Select the 400x magnification. If necessary, adjust the fine focus. Now, what do you see? I see one cell and I can also see green things in and on it.

Revolutionizing K-12 Blended Learning through the i²Flex Classroom Model Avgerinou, Maria D., Gialamas, Stefanos P., 2016-06-20 Blended learning has gained significant attention recently by educational leaders, practitioners, and researchers. iFlex, a variation of blended learning, is based on the premise that certain non-interactive teaching activities such as lecturing can take place by students without teachers' direct involvement. Classroom time can then be used for educational activities that fully exploit teacher-student and student-student interactions, allowing for meaningful, personalized feedback and scaffolding on demand. *Revolutionizing K-12 Blended Learning through the iFlex Classroom Model* presents a well-rounded discussion on the iFlex model, highlighting methods for K-12 course design, delivery, and evaluation, in addition to teacher performance assessment in a blended iFlex environment. Emphasizing new methods for improving the classroom and learning experience, in addition to preparing students for higher education and careers, this publication is an essential reference source for pre-service and in-service teachers, researchers, administrators, and educational technology developers.
