evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive and thoroughly indexed and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands on science teaching and concerned parents. *The British Library General Catalogue of Printed Books 1976 to 1982* British Library, 1983

Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change Gustavo J. Nagy, Desalegn Yayeh Ayal, 2025-11-04 Over recent years, nature based solutions (NbS) have gained popularity as tools to ameliorate the effects of climate change while slowing down the global warming process. More specifically, the potential of NbS has been explored in terms of meeting greenhouse gas emissions targets and fostering climate change adaptation. NbS are methods that use and enhance nature to improve social and environmental challenges. They involve several multifaceted actions that work sustainably to restore and protect the natural environment while helping people. Therefore, these solutions are useful in climate change adaptation and mitigation. There are 3 main areas which NbS may target, namely reducing exposure, reducing sensitivity and supporting adaptive capacity. Reducing exposure refers to protecting areas from existing climate change effects. There is thus a perceived need to document and promote experiences related to NbS and to apply these in different contexts. It is against this background that the *Handbook of Nature-Based Solutions to Mitigation and Adaptation to Climate Change* is being produced. The publication will showcase experiences related to NbS from around the world. In particular, it will gather examples of projects, studies and the latest thinking on NbS, which can serve the purpose of inspiring and fostering further work in this key area. Thanks to its scope and thematic diversity, the book will be of special interest to representatives from government organisations, researchers and students from a wide range of natural and social sciences courses. It will also provide useful information to practitioners and representatives from non-governmental organisations.
