**The International Law of Youth Rights** Jorge Cardona, Giuseppe Porcaro, Jaakko Weuro, Giorgio Zecca, 2015-02-04 In 1996 William Angel launched a unique pioneering study tracing the origin growth and basic features of the international law of youth rights. It consisted of both source documents and commentary on the historical trends to elaborate and codify international instruments and standards in this field as well as action taken by governmental intergovernmental and non governmental organizations to promote and protect youth rights. It concluded with a call for a new international instrument and monitoring machinery to better promote and protect the rights of youth on a global basis. The aim of the current revised updated and expanded edition of this ground breaking work is twofold. First to preserve and update the landmark historical research undertaken by William Angel and present it to today's audience. Second to introduce up to date analysis of the state of the International Law of Youth Rights and to provide an easy to use compilation of sources of law for researchers and practitioners active in this field. This important collection will provide a roadmap for readers to finding the various sources of the International Law of Youth Rights and a reference point for the most relevant legal documents in force. It aims to spark further legal political and sociological research in the academic field as well as support even stronger advocacy actions to further the rights of young people. Two volume set

component of the rapidly growing and changing global legal milieu The IMLI Treatise On Global Ocean Governance David Joseph Attard, Malgosia Fitzmaurice, Alexandros Ntovas, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance. However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Conventions burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of the UN Specialized Agencies towards the development of effective and sustainable ocean governance by looking at the more elaborate mechanisms they developed in order to achieve the desired objectives laid down in UNCLOS. From FAO to UNODC the volume examines how they ensure sustainable development and how much coordination exists among them **A**
