Content-rich case studies on a wide range of policy issues, including regulatory policy, natural resources, manufacturing, financial services, and health care, highlight opportunities for government and business to collaborate to pursue the public good. This book offers current and future public managers possible solutions to complex problems for effective government business alliances in a range of settings. *Governance of Natural Resources* Jin Satō,2013 Scholarly communities and policy experts have a tendency to divide natural resources into categories hindering holistic understanding Similarly the stakeholders themselves the state business and people are conceived monolithically making it difficult to grasp how business interests intra bureaucratic politics and civil society movements influence policy outcomes This book examines the socio political dynamic generated by the environment and its attendant resources how nature becomes a resource and how this process in turn shapes our vision of society It deploys a case study approach in examining the interactions between bureaucratic institutions rural communities national leaders and business elites allowing for a more nuanced analysis Particular emphasis is placed on how resources become the subject of conflict but also opportunities for cooperation and how different societies might establish more sustainable interactions with nature The way society controls natural resources is the foundation of both economic development and environmental conservation The primary motive for natural resource management has been the development and production of marketable commodities and institutional structures have been shaped accordingly The Social Constitution of Natural Resources asks that we re consider the very concept of resources and how we view them
