Polczynska, Katarzyna Jankowiak, 2025-02-14 With the majority of the world population speaking more than one language cross language interactions associated with bi and multilingual language processing have recently received much scholarly attention While we know from psycholinguistic research that multilingualism modulates cognitive mechanisms of language processing previous studies have concentrated selectively on specific aspects and or stages of language processing with little cross disciplinary insight into multilingualism This contribution aims to systematize our knowledge of multilingual language processing by providing a comprehensive overview of the effects observed at the level of sub lexical orthographic and phonological lexico semantic and discourse processing

Further since comprehensive studies of multilingualism require other areas of research e g psychology sociology and linguistics the present volume will bring together multiple fields methods and perspectives to provide a cross disciplinary and diverse overview of the effects of multilingualism
