**Superabsorbent Polymers** Aiqin Wang, Yongfeng Zhu, 2025-09-12 This book introduces in detail the development history synthesis methods physicochemical properties and the main application in agriculture hygiene construction environmental management bioscience and more based on the multiple properties including absorption flexibility elasticity sensitivity etc Edited by experts in the area the book also highlights the biodegradability commercial viability and market potential of SAPs SAP composites the feasibility of using biomass as raw materials for SAP production This well rounded consideration of the topic makes this book suitable for a range of academic professionals and industry professionals working in polymer science material science and environmental science *3rd International Conference on the Application of Superabsorbent Polymers (SAP) and Other New Admixtures Towards Smart Concrete* William P. Boshoff, Riaan Combrinck, Viktor Mechtcherine, Mateusz Wyrzykowski, 2019-11-20 The book gathers the peer reviewed contributions presented at the 3rd International Conference on Application of Superabsorbent Polymers SAP and Other New Admixtures towards Smart Concrete held in Skukuza South Africa on November 25 27 2019 It features papers focusing on the behavior of SAP in concrete in particular the absorption behavior as well as the effect of SAP on fresh and hardened concrete properties It also covers topics such as other modern admixtures in particular rheology modifying admixtures including the recently emerging field of bio or waste derived admixtures The conference builds on the experience and summarizes the activities of the RILEM Technical Committee 260 RSC Recommendations for Use of Superabsorbent Polymers in Concrete Construction and addresses other prominent research activities in the field of concrete admixtures Folded Synthetic Peptides for Biomedical Applications Alessandro Contini, Jutta Eichler, 2019-09-26 Folded peptides and peptide motifs within proteins are abundant in living organisms where they are essential for the biological activities of the peptides and proteins During the past decades much research has been dedicated to understanding the rules that govern peptide folding Simultaneously a range of strategies have been established for the conformational stabilization of bioactive peptides as well as for the de novo design of peptides with defined secondary structures These methods are either based on the chemical modification of the peptide backbone such as cyclization and stapled peptides or on the use of a range of non proteinogenic amino acids that in a defined sequential arrangement induce secondary structures peptides Such building blocks include D and other non proteinogenic amino acids as well as beta and gamma amino acids This Research Topic comprises a collection of papers by an international group of 77 scientists with a background in synthetic analytical computational and medicinal chemistry as well as in biochemistry and pharmacology Their research is presented here in a total of 11 papers 8 original research reports and 3 reviews covering diverse aspects of folded synthetic peptides These studies include the preparation and characterization of new peptide monomers with interesting folding properties the synthesis and conformational analysis of non natural peptides as well as the use of folded peptidomimetics as molecular switches Additionally a range of biomedical

applications such as antimicrobial anti inflammatory antiangiogenic and immune stimulating activities are also reported We hope this eBook will be a source of inspiration and knowledge for scientist in various disciplines related to folded peptides and their many applications as well as for those who want to learn more about this fascinating field of research **EU**
