IBM WebSphere Application Server Liberty Profile Guide for Developers Miho Hachitani, Catalin Mierlea, Pete Neergaard, Grzegorz Smolko, IBM Redbooks, 2015-09-09

IBM WebSphere Application Server V8.5 includes a Liberty profile, which is a highly composable dynamic application server profile. It is designed for two specific use cases: Developer, with a smaller production run time and production environments. For a developer, it focuses on the tasks that a developer does most frequently and makes it possible for the developer to complete those tasks as quickly and as simply as possible. For production environments, it provides a dynamic, small footprint run time to be able to maximize system resources.

This IBM Redbooks publication provides you with information to effectively use the WebSphere Application Server V8.5 Liberty profile along with the WebSphere Application Server Developer Tools for Eclipse for development and testing of web applications that do not require a full Java Platform. It provides a quick guide on getting started, providing a scenario-based approach to demonstrate the capabilities of the Liberty profile along with the developer tools. This provides a simplified but comprehensive application development and testing environment. The intended audience for this book is developers of web and Open Services Gateway initiative (OSGi) applications who are familiar with
