Firm Search Sectoral Shifts And Unemployment Studies On Labor:

Firm Search, Sectoral Shifts, and Unemployment Eugenia Kazamaki, 1991 The aim of this thesis is to highlight some features of labour market adjustment. The study relates to the Swedish labour market which is characterized by considerable government intervention, extensive labour market legislation, high labour force participation and a high degree of unionization. The focus is on the adjustment process in the presence of government measures, legislative changes, informational asymmetries and differences in firm characteristics. Herein firm search and employment shifts are analyzed with respect to these concepts. Sectoral and regional characteristics are specifically emphasized and extensions of existing labour market theory.

Long-term Unemployment in a Full Employment Economy Sören Höjgård, 1994

Business Cycles and Depressions David Glasner, 2013-12-16. Experts define, review and evaluate economic fluctuations. Economic and business uncertainty dominate today's economic analyses. This new Encyclopedia illuminates the subject by offering 323 original articles on every major aspect of business cycles, fluctuations, financial crises, recessions and depressions. The work of more than 200 experts, including many of the leading researchers in the field, the articles cover a broad range of subjects, including capsule biographies of leading economists born before 1920. Individual entries explore banking panics, the cobweb cycle, consumer durables, the depression of 1937-1938, Otto Eckstein, Friedrich Engels, experimental price bubbles, forced savings, the Glass-Steagall Act, Friedrich Hayek, qualitative indicators, use of macro econometric models, monetary neutrality, Phillips Curve, Paul Samuelson, Say's law, supply-side recessions, James Tobin, trend and random wages, Thorstein Veblen, worker job turnover, and more.

Lectures on Macroeconomics Olivier Blanchard, Stanley Fischer, 1989-03-21. The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output, unemployment and movement in prices. Lectures on Macroeconomics provides the first comprehensive description and evaluation of macroeconomic theory in many years. While the authors' perspective is broad, they clearly state their assessment of what is important and what is not as they present the essence of macroeconomic theory today. The main purpose of Lectures on Macroeconomics is to characterize and explain fluctuations in output, unemployment and movement in prices. The most important fact of modern economic history is persistent long-term growth, but as the book makes clear, this growth is far from steady. The authors analyze and explore these fluctuations. Topics include consumption and investment, the Overlapping Generations Model, money, multiple equilibria, bubbles and stability, the role of nominal rigidities, competitive equilibrium, business cycles, nominal rigidities and economic fluctuations, goods, labor and credit markets, and monetary and fiscal policy issues. Each of chapters 2 through 9 discusses models appropriate to the topic. Chapter 10 then draws on the previous chapters, asking which models are the workhorses of

macroeconomics and sets the models out in convenient form A concluding chapter analyzes the goals of economic policy monetary policy fiscal policy and dynamic inconsistency Written as a text for graduate students with some background in macroeconomics statistics and econometrics Lectures on Macroeconomics also presents topics in a self contained way that makes it a suitable reference for professional economists Institutions and Regional Labour Markets in Europe Lambert van der Laan,Santos M. Ruesga,2019-05-23 First published in 1998 this volume examines the performance of labour markets against the background of different economic and institutional settings in Western and Eastern Europe The book gives a clear picture of the mosaic of impressive transformations presently taking place in Western and Eastern European labour markets and provides access to information which was previously either widely dispersed or non existent The book gives detailed information about how countries and regions deal with transformations described The substantive country wide and regional diversity that is discussed allows the reader to understand the role of labour and institutions in the development of countries and regions The book is written by labour market and regional experts from the various countries concerned
