Sullivan,2002 John Sullivan was one of the CIA's top polygraph examiners during the final four years of the war in Vietnam where he served longer and conducted more lie detector tests than any other examiner and worked with more agents than most of his colleagues His job was to evaluate the reliability of the agency's information sources an assignment that gave him a more intimate view of the war than was afforded most other participants **How Charts Lie** Alberto Cairo,2019-10-15 A leading data visualization expert explores the negative and positive influences that charts have on our perception of truth Today public conversations are increasingly driven by numbers While charts infographics and diagrams can make us smarter they can also deceive intentionally or unintentionally To be informed citizens we must all be able to decode and use the visual information that politicians journalists and even our employers present us with each day Demystifying an essential new literacy for our data driven world How Charts Lie examines contemporary examples ranging from election result infographics to global GDP maps and box office record charts as well as an updated afterword on the graphics of the COVID 19 pandemic

*Trading and Investing in the Forex Markets Using Chart Techniques* Gareth A. Burgess,2010-02-09 The financial markets are made up of people from very diverse backgrounds but whether by long or short term investment these market participants all have a desire to win by varying degrees Many market participants especially short term traders are often too interested in the release of some fundamental statement or some rumor or the latest bank recommendations than in the trading price of the asset which leads them to trade and fail because of emotions based trading The daily price movements the patterns the volatility that appear on charts are for whatever reason the results of the actions of the crowd To avoid making decisions based on heightened emotions it is necessary to create your own plan based on your own analysis This book has been developed to demonstrate how a few relatively straight forward techniques can create a plan that does not rely on outside investment recommendations and therefore takes the emotions out of trading The book demonstrates how to interpret the market price action in the shape of forms or patterns and Japanese candlesticks to help you Find markets that are changing from bullish to bearish and from bearish to bullish Locate entry and exit points Monitor the position for signs of change The book provides a series of charting techniques involving the use of candlesticks as graphical representations of

market price actions in the Foreign Exchange markets It presents methods of chart technical analysis for medium to long term investing in a market where despite strong returns when compared with other asset types it is difficult to realize a profitable return The title does not dwell on already known signals represented by candlestick formations but concentrates instead on how to confirm these signals by applying a variety of confirmation techniques which form a step by step process through the chapters of the book to finish by Putting It All Together
