Innovative Curriculum Materials ,1999 ENC Focus ,1999 Games and Simulations in Science Education Henry Ellington,Eric Addinall,Fred Percival,1981 During the last few years a large number of science based games simulations and case studies have been developed and these are now starting to be built into the curricula of our schools colleges and universities The use of such exercises seems certain to increase as more and more teachers lecturers and curriculum designers become aware of their great potential Until now however these developments have been hampered by the fact that there has been no basic text on science based games and no source book to which potential users could refer to find out what exercises were available in their particular field This book has been written in an attempt to fill both these gaps Introduction
