Standard 2015 And 2016 All Subject Weaihtage:

Education in Singapore Yew-Jin Lee, 2022-04-06 This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to education and educational issues. There are three sections. Part 1 provides a sectorial overview of how education has been organized in this country, such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here, such as underachievement, leadership, language education, assessment, and meritocracy. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter: history of Physical Education, Art, Music, Geography, Education, etc. in Singapore. *Urinalysis in the Dog and Cat* Dennis J. Chew, Patricia A. Schenck, 2023-04-18 *Urinalysis in the Dog and Cat* A comprehensive up-to-date textbook for performing and interpreting urinalysis in dogs and cats with content that remains accessible to those in primary care and specialty practices. In *Urinalysis in the Dog and Cat*, a logical sequence to collection of urine, performing the complete urinalysis, physical and chemical properties, along with urinary sediment microscopy and interpretation of results is presented. The FAQ chapter and the chapter on urinalysis case examples provide easily accessible information for primary care veterinarians and technicians, as well as veterinary students. Each didactic chapter is designed to provide basic information first and then more advanced materials deeper into each chapter. Some materials will also be useful to specialists and those in advanced training. An extensive review of proteinuria is included as a separate chapter. Automated urine chemistry by dipstick and automated urinary sediment microscopy are discussed in some detail as this technology increasingly will be incorporated in veterinary laboratory practice. The text is accompanied by hundreds of high-quality photographs and medical illustrations that highlight common and rare findings from the urine of dogs and cats. Numerous algorithms suggest possible pathways for the diagnosis and treatment of urinary disorders. This book is destined to be widely used in veterinary hospitals by seasoned and young attending veterinarians seeking to know more about urinalysis, as well as by veterinary laboratory technicians. Several sections of this book will be useful in the teaching of basic concepts to veterinary students. The authors have also included an introduction to the philosophy of urinalysis and the detailed information about collection of urine from dogs and cats. Comprehensive explorations of urine sample handling, preparation, and analysis. Detailed aspects of USG as the most important physical property of canine and feline urine. In-depth discussions of urine chemistry, dipstick evaluation for pH, protein, occult blood, glucose, ketones, and bilirubin. Extensive detailing of urinary sediment microscopy. Sections on FAQ and urinalysis case examples allow the reader to test their knowledge about urinalysis. *Urinalysis in the Dog and Cat* is an essential reference for primary care veterinarians, veterinary technicians, veterinary students, those in advanced training.
