

AP Environmental Science Chapter 1

Living in the Environment- Pettit

Posts Exam

environment - Answer everything around us, including the living and nonliving things with which we interact in a complex web of relationships that connect us to one another and to the world we live in

environmental science - Answer an interdisciplinary study of how humans interact with the environment of living and nonliving things. It integrates information and ideas from the natural sciences, such as biology, chemistry, and geology, the social sciences, such as geography, economics, political science, and demography (the study of populations), and the humanities, including philosophy and ethics

Goals: learn how nature works, how the environment affects us, how we affect the environment, and how to deal with environmental problems and live more sustainably.

ecology - Answer the biological science that studies how organisms, or living things, interact with their environment and with each other. Every organism is a member of a certain species: a group of organisms with distinctive traits and, for sexually reproducing organisms, can mate and produce fertile offspring.

Ecosystem - Answer set of organisms within a defined area or volume that interact with one another and with and their environment of non living matter and energy

3 principles of sustainability - Answer 1. solar energy
2. biodiversity
3. chemical cycling

Sustainability - Answer the capacity of the earth's natural systems and human cultural systems to survive, flourish, and adapt into the very long-term future

chemical cycling (nutrient cycling) - Answer The circulation of chemicals necessary for life, from the environment (mostly from soil and water) through organisms and back to the environment.. Must be cycled indefinitely, no new supplies.

natural capital - Answer Natural resources and natural services that keep us and other species alive and support our economies.
