The South African State Transformed? Louis A. Picard, Thomas M. Mogale, Caitlin C. Corrigan, 2024-09-10 This book examines the nature of the 1994 political transition in South Africa and its impact on post-apartheid South Africa. Specifically, it examines the failures of liberalism within the context of the transitional process that led to the institution if not the practice of a non-racial state in 1994. The term liberal is an eclectic term defining a several of views political and economic. We use the term here within context but essentially define it as a commitment to open views the willingness to consider change and to value basic human rights. The nature of institutional change in South Africa as it moved towards a democratic state would influence whether South Africa would succeed as a newly industrializing pluralist democratic country or collapse into yet another African failed state. As South Africa moves toward its fourth decade of majority rule the view towards the future is much less promising than it was in 1994.

Innovative Methods for Rare Disease Drug Development Shein-Chung Chow, 2020-11-11 In the United States a rare disease is defined by the Orphan Drug Act as a disorder or condition that affects fewer than 200 000 persons. For the approval of orphan drug products for rare diseases the traditional approach of power analysis for sample size calculation is not feasible because there are only limited number of subjects available for clinical trials. In this case innovative approaches are needed for providing substantial evidence meeting the same standards for statistical assurance as drugs used to treat common conditions. Innovative Methods for Rare Disease Drug Development focuses on biostatistical applications in terms of design and analysis in pharmaceutical research and development from both regulatory and scientific statistical perspectives. Key Features: Reviews critical issues e.g. endpoint margin selection sample size requirements and complex innovative design. Provides better understanding of statistical concepts and methods which may be used in regulatory review and approval. Clarifies controversial statistical issues in regulatory review and approval accurately and reliably. Makes recommendations to evaluate rare diseases regulatory submissions. Proposes innovative study designs and statistical methods for rare diseases drug development including n of 1 trial design adaptive trial design and master protocols like platform trials. Provides insight regarding current regulatory guidance on rare diseases drug development like gene therapy.

Suid-Afrikaanse Hofverslae, 2015 *Accommodating Muslims under Common Law* Salim Farrar, Ghena Krayem, 2016-07-15 The book explores the relationship between Muslims the Common Law and Shar'ah post 9/11. The book looks at the accommodation of Shar'ah Law within Western Common Law legal traditions and the role of the judiciary in particular in drawing boundaries for secular democratic states with Muslim populations who want resolutions to

conflicts that also comply with the dictates of their faith Salim Farrar and Ghena Krayem consider the question of recognition of Shar'ah by looking at how the flexibilities that exists in both the Common Law and Shar'ah provide unexplored avenues for navigation and accommodation The issue is explored in a comparative context across several jurisdictions and case law is examined in the contexts of family law business and crime from selected jurisdictions with significant Muslim minority populations including Australia Canada England and Wales and the United States The book examines how Muslims and the broader community have framed their claims for recognition against a backdrop of terrorism fears and how Common Law judiciaries have responded within their constitutional and statutory confines and also within the contemporary contexts of demands for equality neutrality and universal human rights Acknowledging the inherent pragmatism flexibility and values of the Common Law the authors argue that the controversial issue of accommodation of Shar'ah is not necessarily one that requires the establishment of a separate and parallel legal system

Wearing the Niqab Anna Piela, 2021-01-14 Bringing niqab wearers voices to the fore discussing their narratives on religious agency identity social interaction community and urban spaces Anna Piela situates women's accounts firmly within UK and US socio political contexts as well as within media discourses on Islam The niqab has recently emerged as one of the most ubiquitous symbols of everything that is perceived to be wrong with Islam barbarity backwardness exploitation of women and political radicalization Yet all these notions are assigned to women who wear the niqab without their consultation niqab debates are held without their voices being heard and when they do speak their views are dismissed However the picture painted by the stories told here demonstrates that for these women religious symbols such as the niqab are deeply personal freely chosen multilayered and socially situated Wearing the Niqab gives voice to these women and their stories and sets the record straight enhancing understanding of the complex picture around niqab and religious identity and agency
